1. Introduction

This document is intended to guide the reader through the process of using Component-2014 software.

Component-2014 is the software for warehouse and analytical accounting of electronic components. It contains the key features for developers of electronics, OEMs, repair services, electronics enthusiasts and hobbyists.

Application features:

- manufacturers, vendors, packages catalogs;
- warehousing management;
- locations feature;
- purchasing history;
- products list;
- categories of components with tree structure;
- kits of products;
- product costing;
- choosing a lot size;
- bill of materials;
- stock sheet;
- printing analytic reports and documents (invoices, orders);
- import and export data;
- password protection;
- user permissions;
- storage of data in the database MS Access;
- portable version with no installer required.

2. Terms & Definitions

Bill of materials - a document containing a list of electronic components with the indication of their quantity necessary for a complete the finished product.

Catalog - an array of structured information.

Catalog of Components - the qualifier of the applied electronic components ordered on functional signs and united in categories.

Category - set of electronic components, combined on a functional basic. Examples of categories: resistors, capacitors, diodes, chips.

Component (electronic component) - an elementary integral part of an electronic device. Synonyms of an electronic component: a radio component, element.

Distributor (vendor) - a company supplier of electronic components.

Kit - two or more products which production and respectively purchase of components are interconnected.

Lot - a quantity of at a time manufactured products or kits.

Package - the unified designation which is determining the geometrical and landing sizes of an electronic component, and also number and an arrangement of its outputs.

Product - an electronic device (module) completed from electronic components.

Section (storage, store) - a physical part of a warehouse for storage of electronic components or other sections.

Vendor (distributor) - a company supplier of electronic components.

3. Installation

3.1. System requirements

Hardware requirements:

- 1) Free disk space at least 10 Mb
- 2) Printer for printing reports (optional)

Software requirements:

- 1) Operating system Windows XP or superior

2) Microsoft .NET Framework version 4.0 or higher (included with the default Windows, and is also available for download on the Microsoft Web site)

3) MS Access Database Driver (.MDB Driver). The driver is a part of, and is available on the computer when you install any of the following software products:

- MS Access 2003, 2007, 2010;
- MS Access Database Engine 2010 Redistributive;
- MS Jet 4.0 Database Engine.

3.2. Installing

The procedure for installing the software is given below:

- 1) Extract the files from the archive (zip package).
- 2) Create a shortcut on the desktop for a quick start of the program.

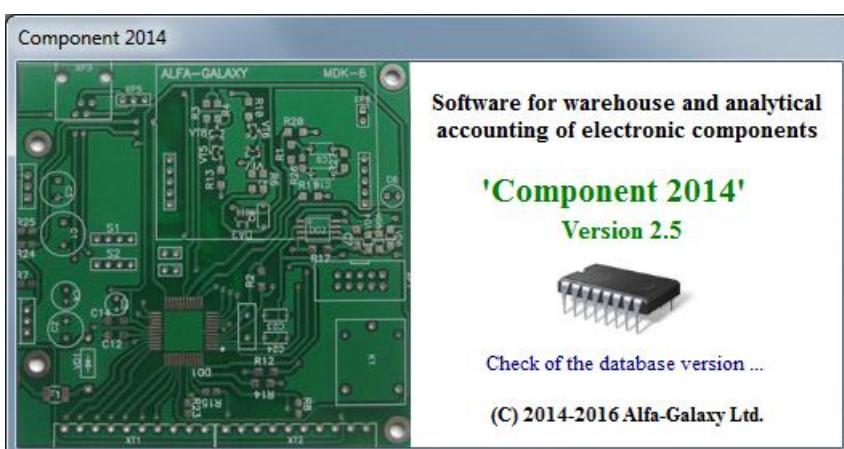

NOTE! When placing the program in the Program Files directory, make sure that the user has rights to create and edit files, or use any other directory.

Place the database on a removable disk for use on different computers.

Place the database on a network drive to use the local network.

3.3. Initial configuration

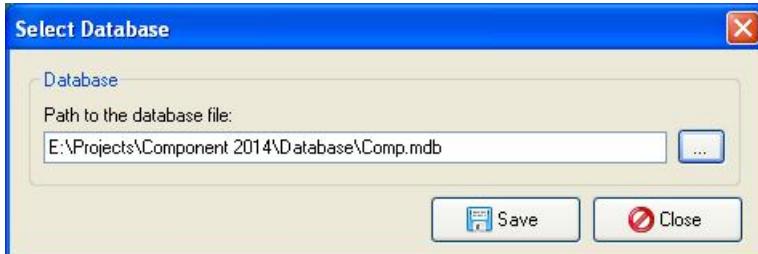

Run the program. Intro dialog is displayed during loading.

At the first start of the program or change the location of the database will be displayed the warning.

Press "OK" and enter or select the file path to the database "Comp.mdb" location.

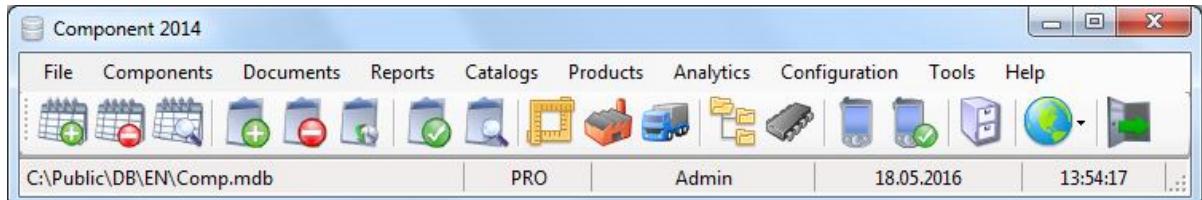

Click "Save". The program will be automatically closed and first step of initial setup is complete. Restart the program. Make the necessary settings using the program "Preferences" of this manual. The program is ready to work.

4. User interface

The program interface consists of a main window and dialog boxes.

4.1. Main window

Main window consists of a main menu, toolbar and status bar.

Main menu contains commands grouped by function.

Toolbar buttons are used for quick access to frequently used commands.

4.2. Main menu

4.2.1. File menu items

Import... - opens the Import dialog.

Page Setup... - opens the Page Setup dialog.

Exit - closes the program.

4.2.2. Components menu items

Add Components... - opens the Add Components dialog.

Write-off Components... - opens the Write-off Components dialog.

Find Components... - opens the Stocks of Components dialog.

4.2.3. Documents menu item

Incoming Invoices... - opens the Incoming Invoices dialog.

Outgoing Invoices... - opens the Outgoing Invoices dialog.

Event Log... - opens the Event Log dialog.

4.2.4. Reports menu item

Stock Sheet... - opens the Stock Sheet dialog.

Purchase Order... - opens the Purchase Order dialog.

4.2.5. Catalogs menu item

Packages... - opens the Packages dialog.

Manufacturers... - opens the Manufacturers dialog.

Distributors... - opens the Distributors dialog.

Categories of Components... - opens the Categories of Components dialog.

Components Catalog... - opens the Components dialog.

4.2.6. Products menu item

List of Products... - opens the Products dialog.

Bill of Materials... - opens the Bill of Materials dialog.

Kits of Products... - opens the Kits of Products dialog.

Kits Contents... - opens the Kits Contents dialog.

4.2.7. Analytics menu item

Stock Turnover... - opens the Stock Turnover dialog.

Receipts from Suppliers... - opens the Receipts from Suppliers dialog.

Consumption for Products... - opens the Consumption for Products dialog.

Used Components... - opens the Used Components dialog.

Applicability of Component... - opens the Applicability of Component dialog.

Range of Supplies... - opens the Range of Supplies dialog.

Dynamics of Prices... - opens the Dynamics of Prices dialog.

4.2.8. Configuration menu item

Settings... - opens the Settings dialog.

Users... - opens the Users dialog.

Function Keys... - opens the Function Keys dialog.

Store Sections... - open the Store Sections dialog.

4.2.9. Tools menu item

Select Database... - opens the Select Database dialog.

Delete Data... - opens the Delete Data dialog.

4.2.10. Help menu item

License Info... - opens the License Info dialog.

System Information... - opens the System Information dialog.

About... - open the About dialog.

4.3. Dialogs

The size and position of all dialog windows containing the table can be changed by the user. Changes the user interface are saved and restored automatically by the program.

4.3.1. Buttons

Buttons in the dialog windows unified. Buttons with the same icons perform similar functions in all dialog boxes. The buttons shown in the table:

| № п/п | Кнопка | Название | Назначение кнопки |
|-------|--------|--------------------|---|
| 1 | | Open File | Button press opens a file selection dialog box containing the selected type of data to be imported into the database. |
| 2 | | Import | Button press opens the Import dialog box depending on the current dialog box. |
| 3 | | Export to File | Button press opens a file selection dialog to export data from the table. Data will export from the visible columns in the table and in the selected sort order. |
| 4 | | Preview | Button press opens a preview of the document or report. |
| 5 | | Print | Button press sends a document or report to print on the default printer. |
| 6 | | Add | Button press adds a new object to the table. Depending on the type of object is created or an object with default attributes, or displays a dialog for entering the attributes of the object. |
| 7 | | Edit | Button press opens a dialog to change an object attributes. The button is active when the object selected. |
| 8 | | Move | Button press opens a dialog to select a new parent for an embedded object in the hierarchical list. |
| 9 | | Delete / Cancel | Button press deletes the selected object in a table or cancels the selected operation. |
| 10 | | Save to DB | Button press saves the changes made to the database. The button is active when data changed. |
| 11 | | Find | Button press starts the search or opens a window to enter the criteria search. |
| 12 | | Criteria Search | Button press opens a dialog box for data selection criteria to display in the table. |
| 13 | | Photo | Button press opens the "Photo" dialog box to view and change the image of the selected object. |
| 14 | | Refresh | Button press reloads the data from the database to display in the table. |
| 15 | | Columns Selections | Button press shows a list of possible columns to select / deselect the columns in the table. |
| 16 | | Options | Button press opens the settings for the current dialog box. |
| 17 | | Select | Button press selects the current object in the table or list and closes the dialog box. The button is active when you can select an object. |
| 18 | | Help | Button press opens help information associated with the current dialog. |

4.3.2. Sorting records and customizing tables

Width, visibility and the order of columns can be adjusted in all the tables. Use drag & drop columns for adjust. The sort order of records can be changed click on the title of a table column.

4.4. Function keys

To access frequently used functions of the program allows you to use the "hot" keys. They may be either function keys or combinations of keys: CTRL + alphabetic key. The specified key combinations are pre-configured and can not be changed by the user. You can view "hot" keys and adjust function keys in the "Function keys" dialog.

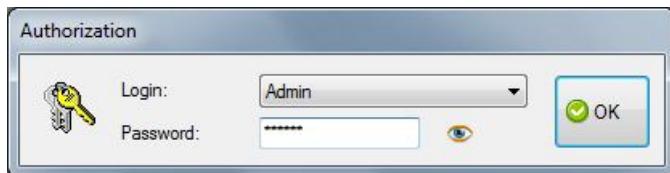

The list of "hot" keys given in the table:

| Main Window | |
|-------------|--------------------------------------|
| Ctrl + C | Open the "Components Catalog" dialog |
| Ctrl + W | Open the "Find Components" dialog |
| Ctrl + L | Open the "Event Log" dialog |
| Dialogs | |
| Ctrl + V | Press button "Preview" |
| Ctrl + A | Press button "Add" |
| Ctrl + F | Press button "Find" |
| Ctrl + S | Press button "Select" |

5. Working with the software

5.1. Authorization

You will see this dialog when start the program if the authorization mode enabled.

Select user and enter the current password. Password embedded user "Admin" default - "123456". To enter the program, click button "OK".

By default the request of authorization is disabled. Authentication mode is being selected in dialog "Users".

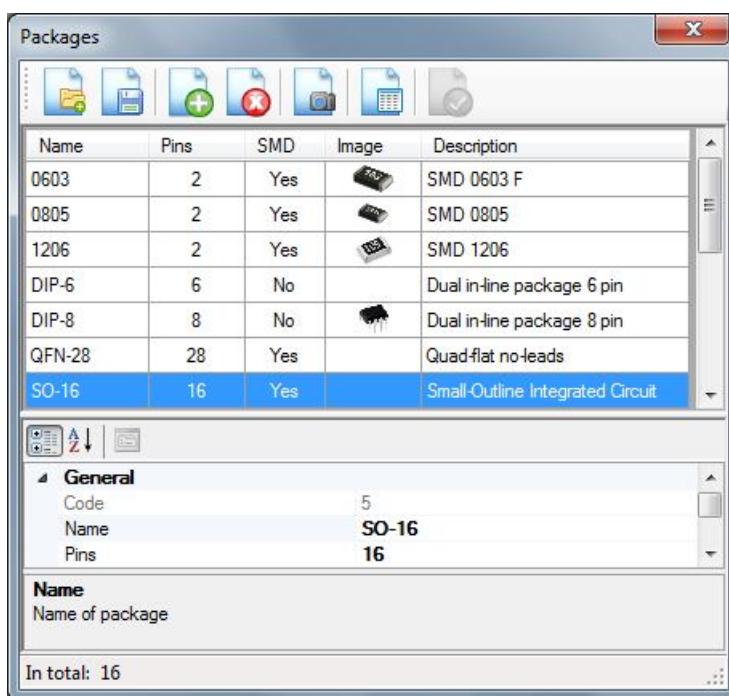

5.2. Catalogs

Use of catalogs allows exclude repeated input of often used data.

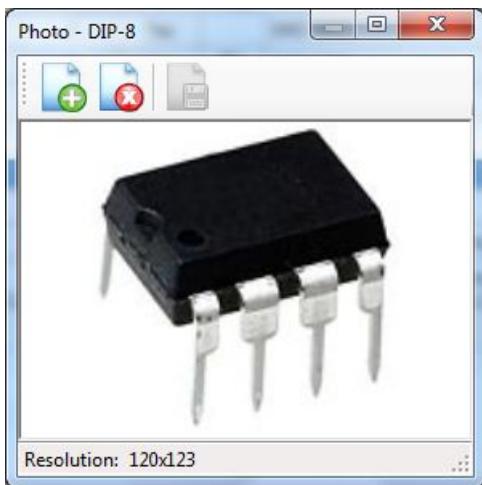

Catalogs contain as the basic data delivered together with the program, and the data entered by the user in the course of work.

5.2.1. Packages catalog

The program includes list packages of electronic components.

To view, add or delete the image of object, click "Photo". "Photo" dialog box will appear.

5.2.2. Manufacturers

The program contains the reference manufacturers of electronic components. Directory allows you to set the relationship between manufacturers and component suppliers.

| Name | Full Name | URL | Note |
|---------|---------------------------------|--|---------------|
| AD | Analog Devices Inc. | www.analog.com | |
| AIC | Hitachi AIC Inc. | www.hitachi-aic.com | capacitors |

| Note | RF-connectors |

Name
Name of manufacturer

In total: 45

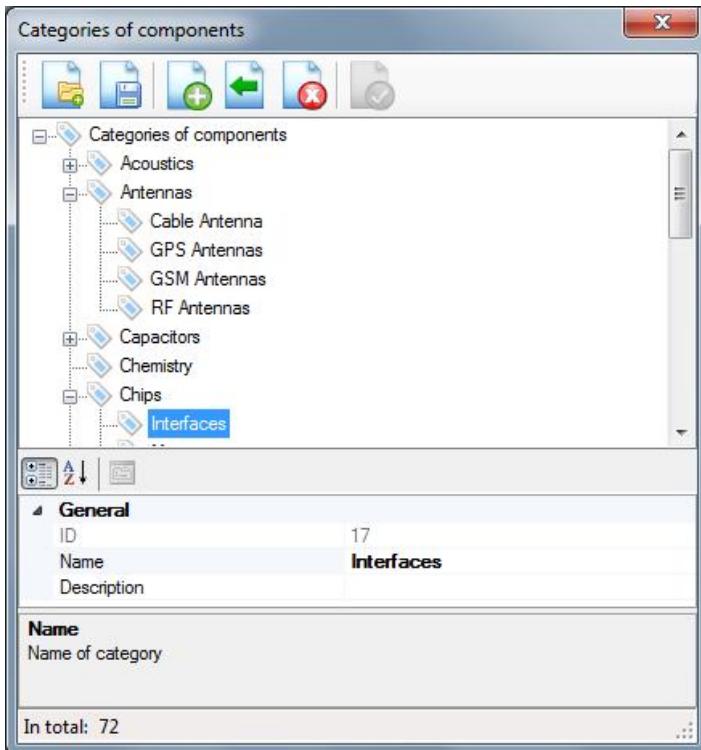

5.2.3. Distributors

The program contains a catalog of suppliers of electronic components. Catalog allows you to set the relationship between manufacturers and component suppliers.

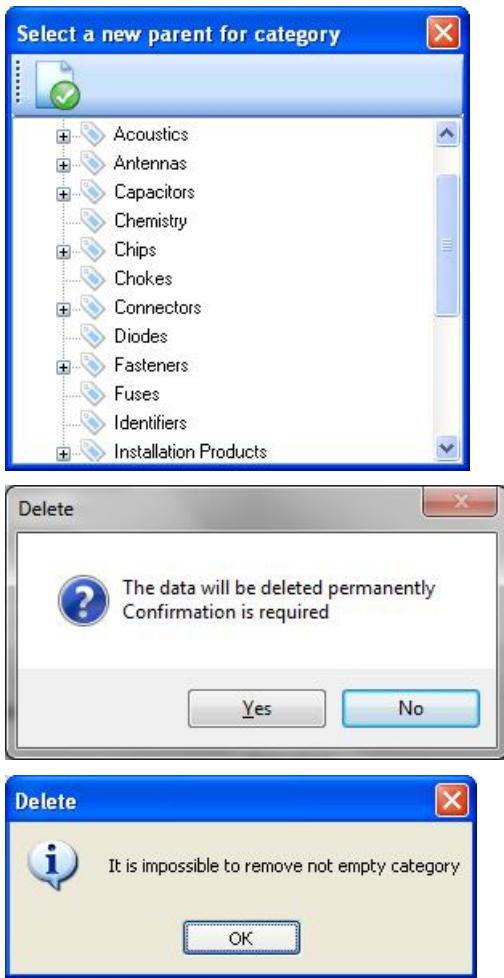

5.2.4. Categories of components

Categories allow you to create a hierarchical list to find the desired component quickly. The entire range of components is divided into categories.

To expand or collapse all nodes right click on the tree. Select "Expand All" or "Collapse All" item in the context menu.

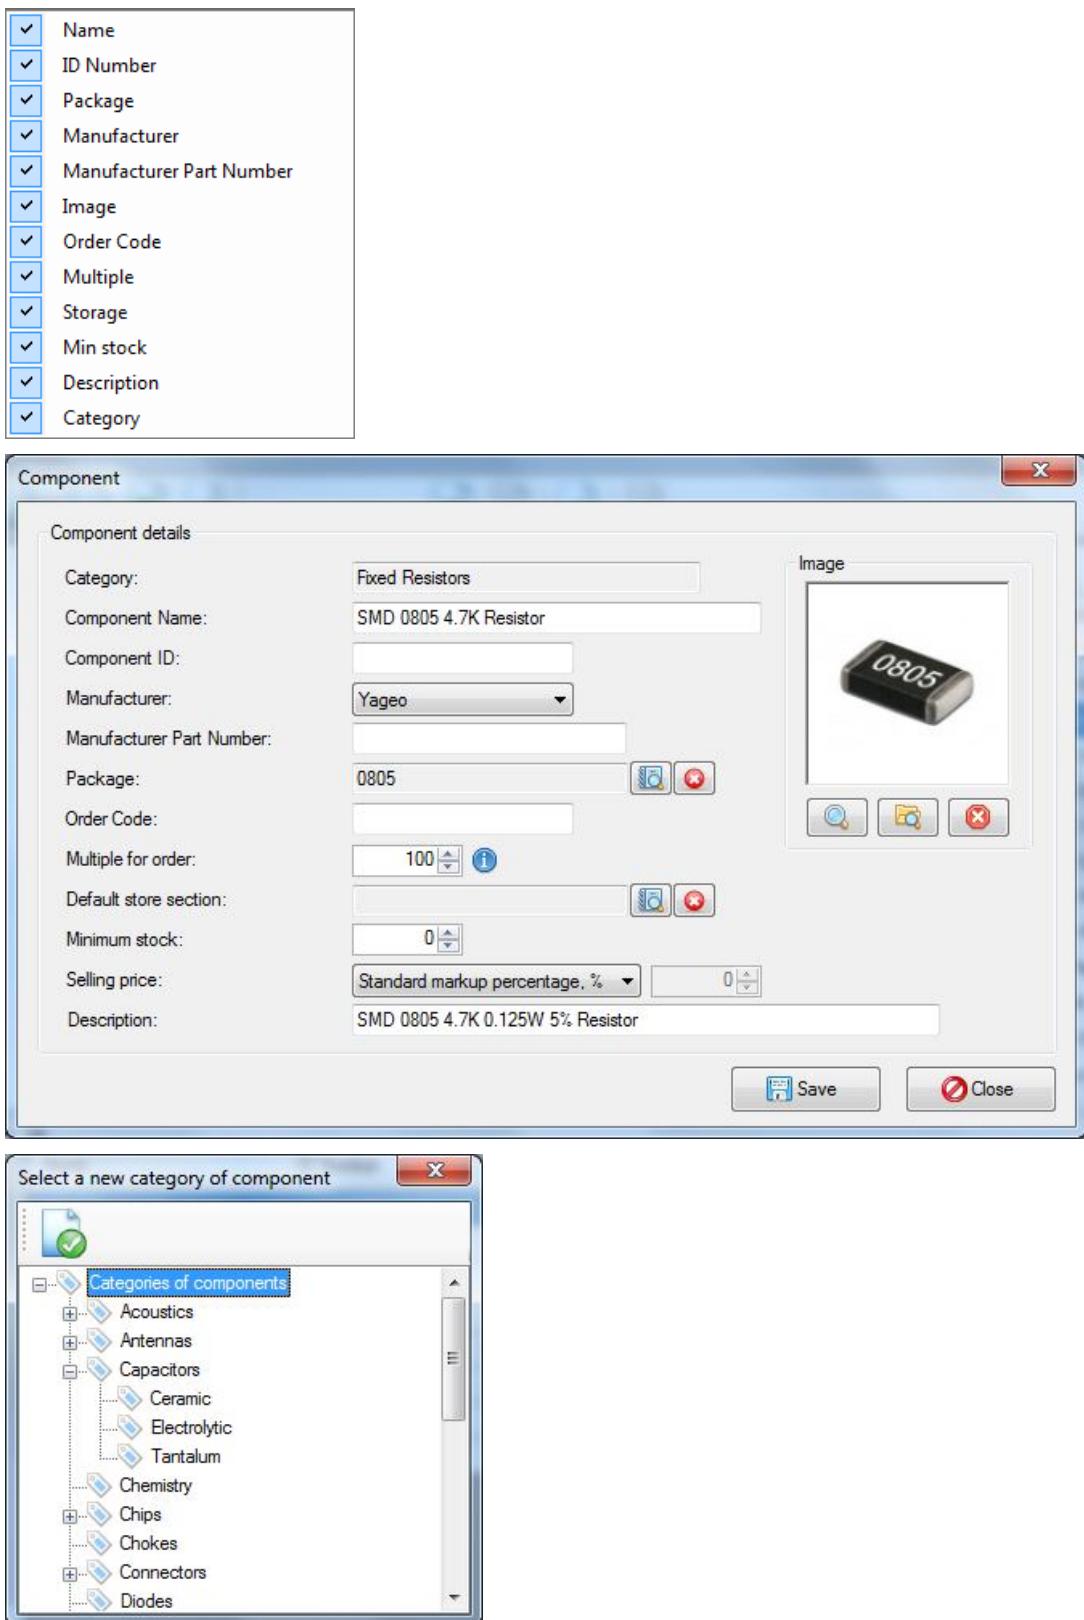

5.2.5. Components Catalog

The program contains a directory of electronic and other components used.

To view, supplement or modify the catalog, select option "Components Catalog" menu "Catalogs".

| Name | Package | Manufacturer | Image | Multiple | Description | Min stock |
|----------------------------|---------|--------------|-------|----------|----------------------------------|-----------|
| 510 Ohm Resistor | | | | 1 | 510 Ohm Resistor | 0 |

| SMD 0805 47K Resistor | 0805 | Yageo | | 1 | SMD 0805 47K 0.125W 5% Resistor | 10 |
| SMD 0805 510 Ohm Resistor | 0805 | | | 1 | SMD 0805 510 Ohm Resistor | 0 |
| SMD 0805 75 Ohm Resistor | 0805 | | | 1 | SMD 75 Ohm 0.125W 5% Resistor | 0 |
| SMD 1206 1 Ohm Resistor | 1206 | | | 1 | SMD 1 Ohm 0.125W 5% Resistor | 0 |
| SMD 1206 10K Resistor | 1206 | | | 1 | SMD 1206 10K Resistor | 0 |
| SMD 1206 10K Resistor | 1206 | Yageo | | 1 | SMD 1206 10K Resistor | 0 |
| SMD 1206 1K Resistor | 1206 | Yageo | | 1 | SMD 1206 1K Resistor | 0 |
| SMD 1206 200K Resistor | 1206 | | | 1 | SMD 1206 200K Resistor | 0 |
| SMD 1206 220 Ohm Resistor | 1206 | | | 1 | SMD 1206 220 Ohm Resistor | 0 |
| SMD 1206 Zero-Ohm Resistor | 1206 | | | 1 | SMD 1206 Zero-Ohm Resistor | 0 |

To expand or collapse all nodes right click on the tree. Select "Expand All" or "Collapse All" item in the context menu.

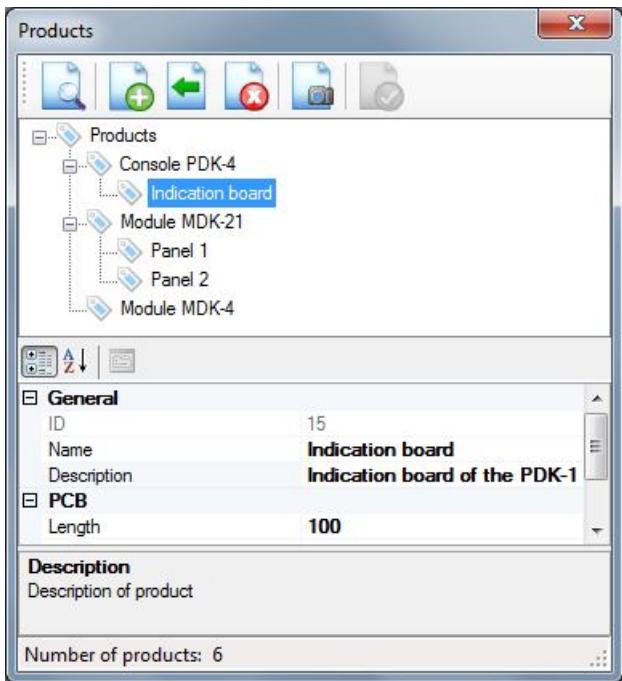

5.3. Products

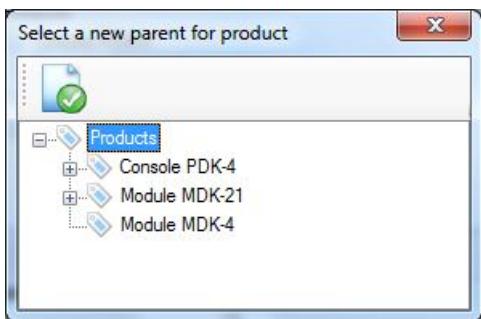

5.3.1. List of Products

The program supports nested grouping of manufactured products. For example, the device may include multiple modules, the modules divided into blocks, and the blocks on the electronic board.

To generate the classifier manufactured products, click option "List of Products" menu "Products".

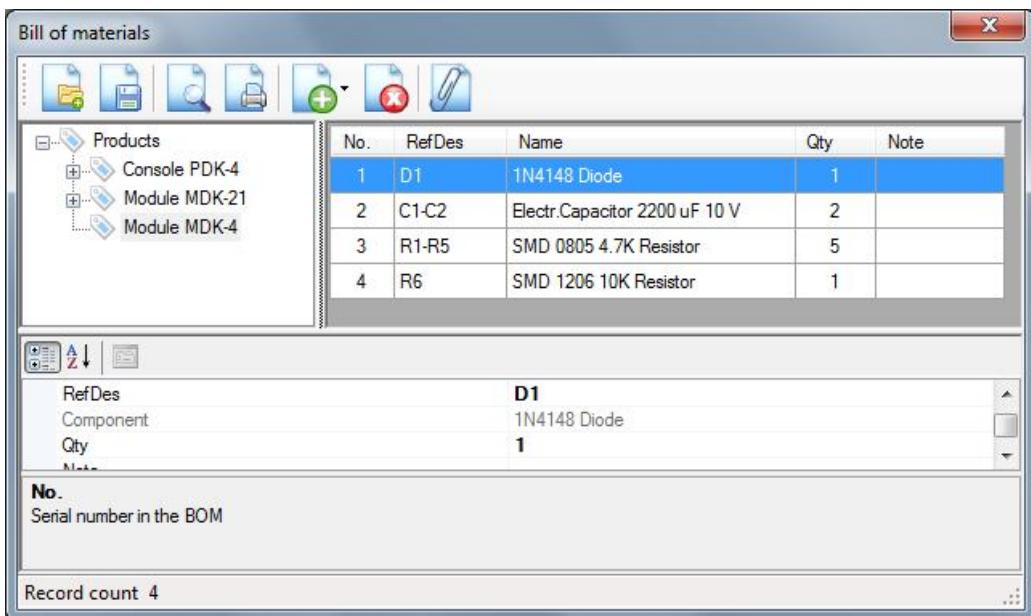

To expand or collapse all nodes right click on the tree. Select "Expand All" or "Collapse All" item in the context menu.

5.3.2. Bills of Materials

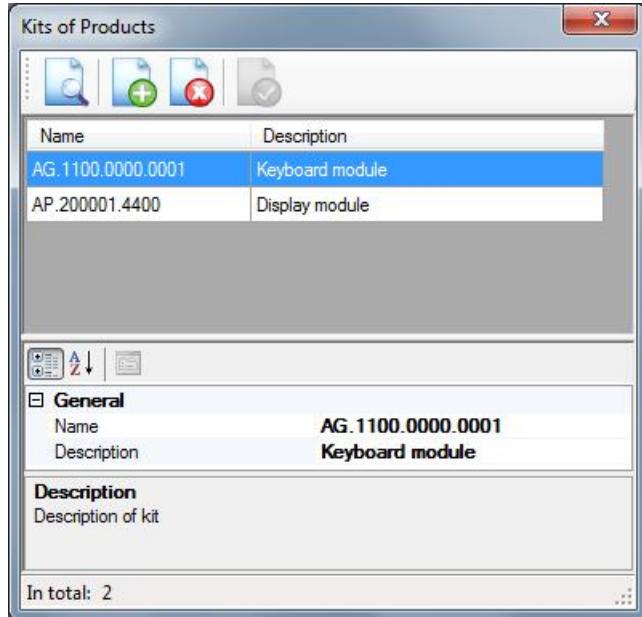

The set of components required for a complete of products is created in the form of a BOM.

To expand or collapse all nodes right click on the tree. Select "Expand All" or "Collapse All" item in the context menu.

5.3.3. Kits of Products

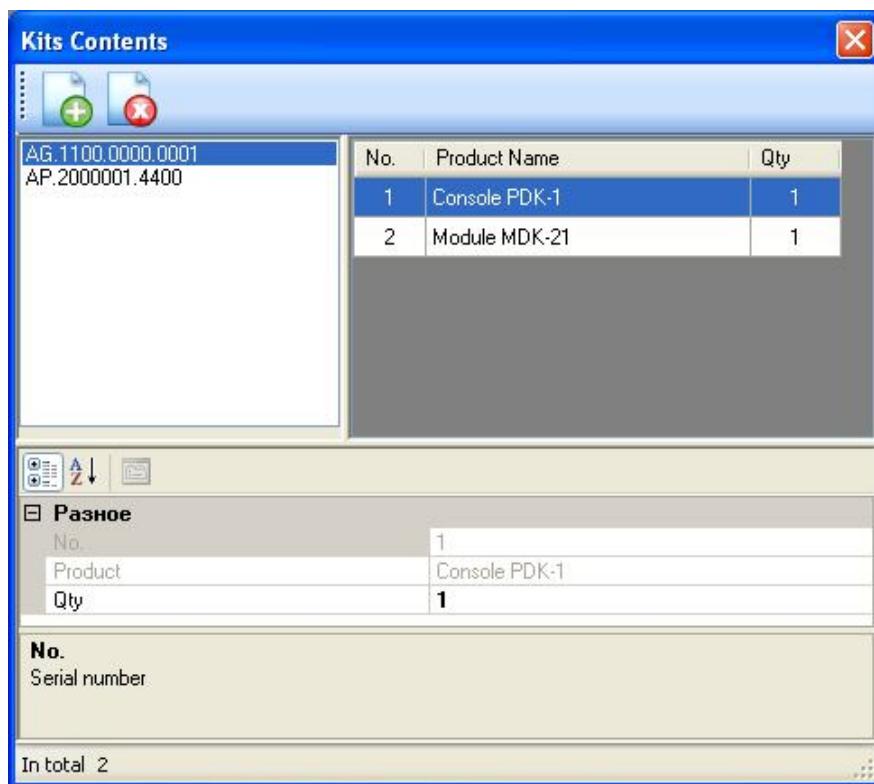

The program supports sets of products. This feature allows you to automatically calculate the cost of sets and generate statements for a set of products.

5.3.4. Kits Contents

The kit may include two or more products.

To specify the composition of kits click item "Kits Contents" menu "Products".

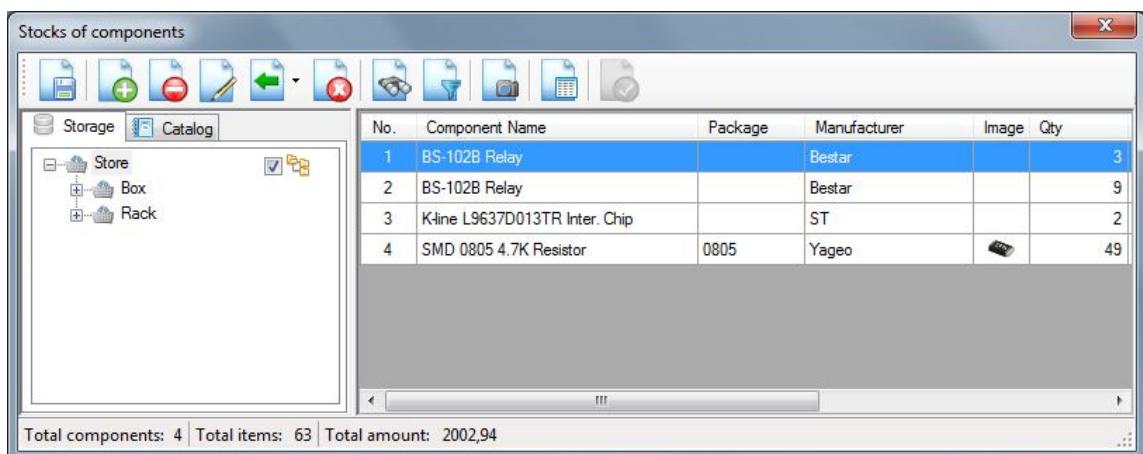

5.4. Actions on Components

The program allows you to record the following actual transactions carried out with the electronic components:

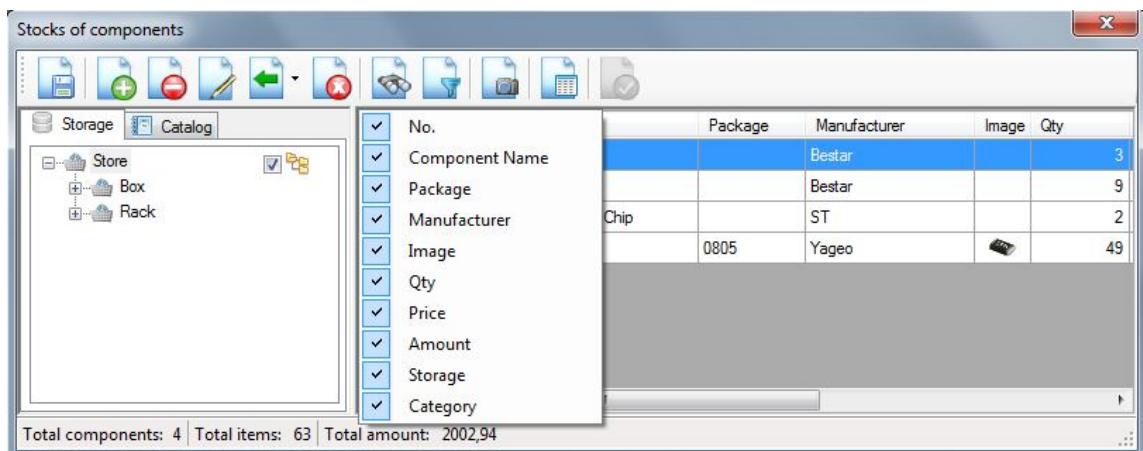

- Search for the availability of components;
- Receipt of components;
- The placement of components in stock;
- Consumption of components for the production of products;
- Adjustment of stocks;
- Cancel actions.

5.4.1. Find Components

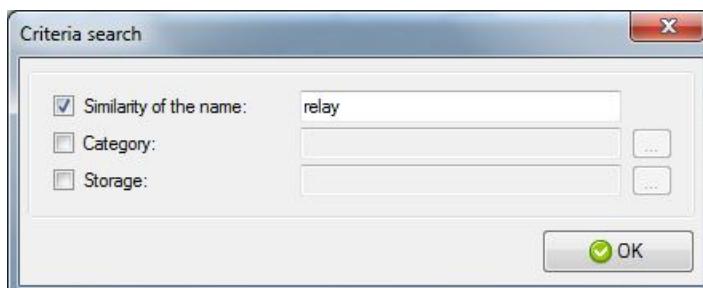

"Find Components" dialog allows you to view the availability of components in each section of the warehouse or to search for the presence of the components meeting the specified search criteria.

Click the button "Columns Selection" to set the visible columns.

Click the button "Criteria search" to enter the search criteria.

Placement of component

| Component | Manufacturer | Qty | Storage |
|---------------------------|--------------|-----|---------|
| Ceramic Capacitor 0.47 uF | | 8 | Cell LC |
| Ceramic Capacitor 0.47 uF | | 12 | Cell LB |

5.4.2. Receipt of components with registration invoice

Operation of receipt of components is carried out at each purchase of components.

Add components

| No. | Component Name | Manufacturer | Qty | Price | Total |
|-----|---------------------------|--------------|-----|-------|-------|
| 1 | 1N4148 Diode | | 10 | 0.10 | 1.00 |
| 2 | BS-115C-5VDC Relay | Bestar | 2 | 2.00 | 4.00 |
| 3 | 1K Resistor | | 21 | 0.06 | 1.26 |
| 4 | Capacitor SMD 1206 0.1 uF | Murata | 5 | 0.16 | 0.80 |

Total amount: 7.06

Record details

| | | | | | |
|------|------------------------|---------------|------|--------|--------|
| No.: | Component Name: | Manufacturer: | Qty: | Price: | Total: |
| 5 | SMD 0805 4.7K Resistor | Yageo | 8 | 0.10 | 0.80 |

5.4.3. Receipt of components without issuing invoice

The screenshot shows the 'Stocks of components' application interface. On the left, there is a tree view of storage locations: 'Store' (Box, Cell A1, Rack), 'Line K - [Resistors]' (Cell KA, Cell KB), and 'Line L - [Capacitors]'. On the right, a grid displays component details:

| No. | Component Name | Package | Manufacturer | Image | Qty |
|-----|------------------------|---------|--------------|-------|-----|
| 1 | BS-102B Relay | | Bestar | | 3 |
| 2 | BS-102B Relay | Add... | Bestar | | 9 |
| 3 | K-line L9637 | Edit... | ST | | 2 |
| 4 | SMD 0805 4.7K Resistor | 0805 | Yageo | | 50 |

Total components: 4 | Total items: 64 | Total amount: 2003,00

Add Components dialog box:

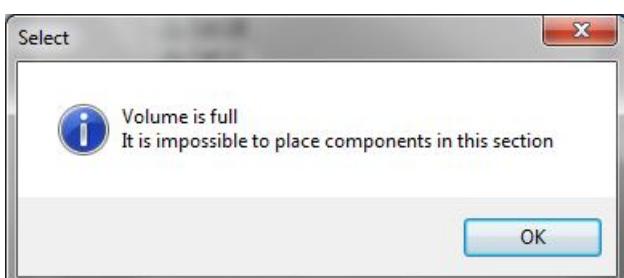

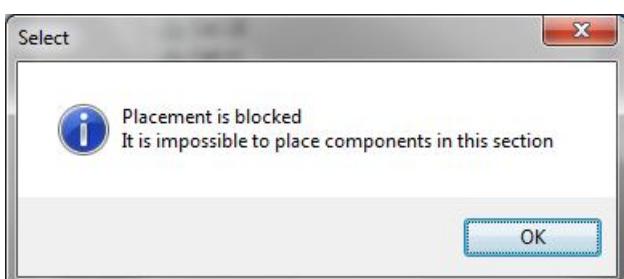

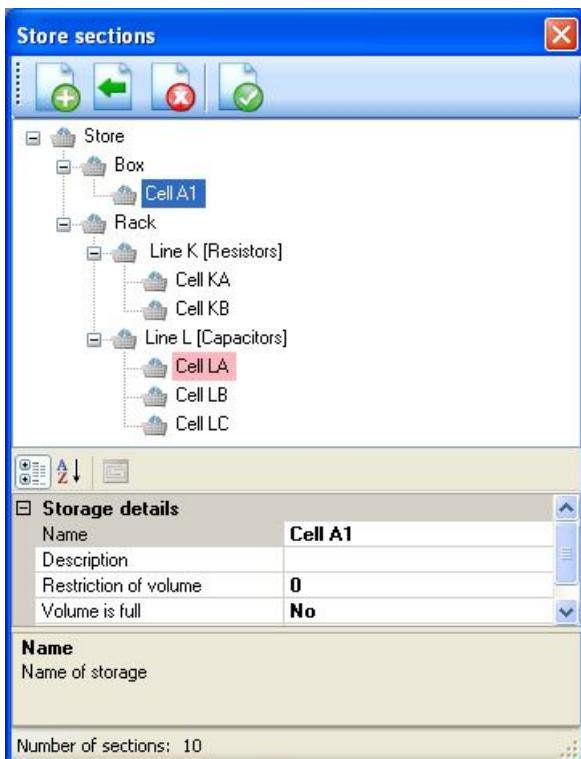

| | |
|-------------------------------------|------------------------|
| Component: | SMD 0805 4.7K Resistor |
| Storage: | Cell A1 |
| Price: | 0,06 |
| Quantity: | 10 |
| <input type="button" value="Save"/> | |

5.4.4. Movement of Components in the Warehouse

The screenshot shows the 'Stocks of components' application interface after component movement. The storage structure remains the same, but the component list now includes additional entries:

| Component Name | Package | Manufacturer | Qty | Cost Price |
|---------------------------|---------|--------------|-----|------------|
| 1K Resistor | | | 21 | 0.06 |
| 1N4148 Diode | | | 10 | 0.10 |
| BS-115C-5VDC Relay | | Bestar | 3 | 2.00 |
| Capacitor SMD 1206 0.1 uF | 1206 | Murata | 5 | 0.16 |
| SMD 0805 4.7K Resistor | 0805 | Yageo | 8 | 0.10 |

Total components: 5 | Total items: 47 | Total amount: 9.86

5.4.5. Write-off of components with registration invoice

Remove Components

| No. | Component Name | Package | Manufacturer | Storage | Qty | Price | Total |
|-----|---------------------------|---------|--------------|---------|-----|-------|-------|
| 1 | 1N4148 Diode | | | Cell A1 | 2 | 0.10 | 0.20 |
| 2 | BS-102B Relay | | Bestar | Cell A1 | 1 | 2.00 | 2.00 |
| 3 | 1K Resistor | | | Cell KA | 13 | 0.06 | 0.78 |
| 4 | SMD 0805 4.7K Resistor | 0805 | Yageo | Cell KB | 2 | 0.10 | 0.20 |
| 5 | Ceramic Capacitor 0.47 uF | | | Cell LB | 3 | 0.16 | 0.48 |

Total amount: 3.66

5.4.6. Write-off of components without issuing invoice

For fast write-off of the components without the need for registration of the invoice in the "Stocks of Components" dialog box, select the component is written off and click on the "Write-off" button.

5.4.7. The adjustment of component stocks

5.4.8. Cancel operations

Cancel operations can return the presence of stocks of components in stock to the state existing before the operation.

Click item "Event Log" menu "Documents". Select the operation to be canceled and click "Cancel" button.

5.5. Viewing and printing documents

The program allows you preview, print, save to files and export to Excel the following primary documents:

- Incoming Invoices;
- Outgoing Invoices.

5.5.1. Incoming Invoices

The screenshot shows two windows related to incoming invoices. The top window is titled "Incoming Invoices" and displays a grid of document details. The columns are Date, Document Number, Vendor, and Note. The data shows several entries for Farnell. The bottom window is a "Document details" dialog box, also titled "Incoming Invoices". It contains fields for Date (set to Wednesday, December 03, 2014), Number (1), Vendor (Farnell), and Note. A "Save" button is at the bottom.

| | Date | Document Number | Vendor | Note |
|---|------------|-----------------|---------|------|
| ► | 27.11.2014 | 1 | Farnell | |
| | 30.09.2014 | 8 | Farnell | |
| | 30.09.2014 | 7 | Farnell | |
| | 30.09.2014 | 5 | Farnell | |
| | 30.09.2014 | 3 | Farnell | |

The form of the report is given in Annex.

5.5.2. Outgoing Invoices

The screenshot shows two windows related to outgoing invoices. The top window is titled "Outgoing Invoices" and displays a grid of document details. The columns are Date, Document Number, Product, and Note. The data shows entries for Panel 2. The bottom window is a "Document details" dialog box, also titled "Outgoing Invoices". It contains fields for Date (set to Wednesday, December 03, 2014), Number (2), Product (Panel 2), and Note (Module MDK-21). A "Save" button is at the bottom.

| | Date | Document Number | Product | Note |

5.5.3. Event Log

All receipts and issues of components record to the event log.

The screenshot shows two windows related to the Event Log:

- Event Log Window:** A grid displaying transaction records. The columns are: No., Date/time, Event, Component Name, Package, Manufacturer, Qty, Price, Total, Storage, and Invoice. The data includes:

| No. | Date/time | Event | Component Name | Package | Manufacturer | Qty | Price | Total | Storage | Invoice |
|-----|------------------|---------|--------------------------------|---------|--------------|-----|---------|---------|---------|---------|
| 1 | 16.03.2016 0:49 | Receipt | SMD 0805 4.7K Resistor | 0805 | Yageo | 50 | 0,05 | 2,50 | | 65 |
| 2 | 16.03.2016 0:57 | Receipt | SMD 0805 4.7K Resistor | 0805 | Yageo | 10 | 0,06 | 0,60 | Cell A1 | |
| 3 | 14.05.2016 14:25 | Receipt | K-line L9637D013TR Inter. Chip | | ST | 1 | 1000,00 | 1000,00 | | 66 |
| 4 | 14.05.2016 14:27 | Receipt | BS-102B Relay | | Bestar | 2 | 0,00 | 0,00 | | |
| 5 | 19.05.2016 12:54 | Issue | SMD 0805 4.7K Resistor | 0805 | Yageo | 1 | 0,06 | 0,06 | Cell A1 | |
- Search Criteria Dialog:** A modal window titled "Search criteria" with fields for Event (set to All), Search period (Beginning date: 17 01 2016 г., End date: 19 01 2016 г.), Component (set to <All components>), and an OK button.

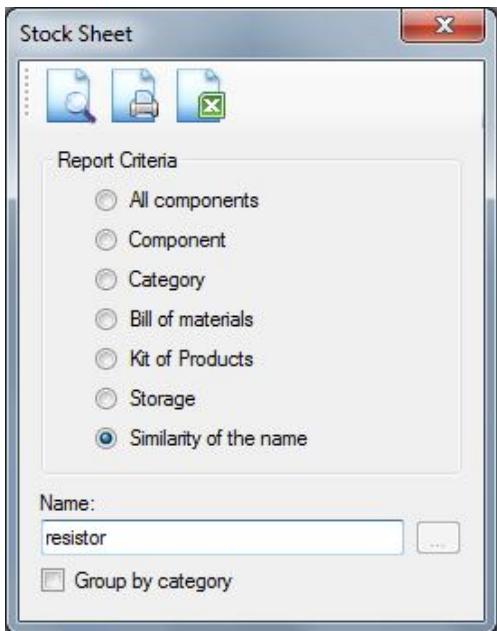

5.6. Actual Reports

The program allows you generate, preview and print the following reports:

- Stock Sheet;
- Purchasing Report.

5.6.1. Stock Sheet

This report allows you to identify the presence and location of components in stock, residues distribution warehouse sections, the total balances for complex products.

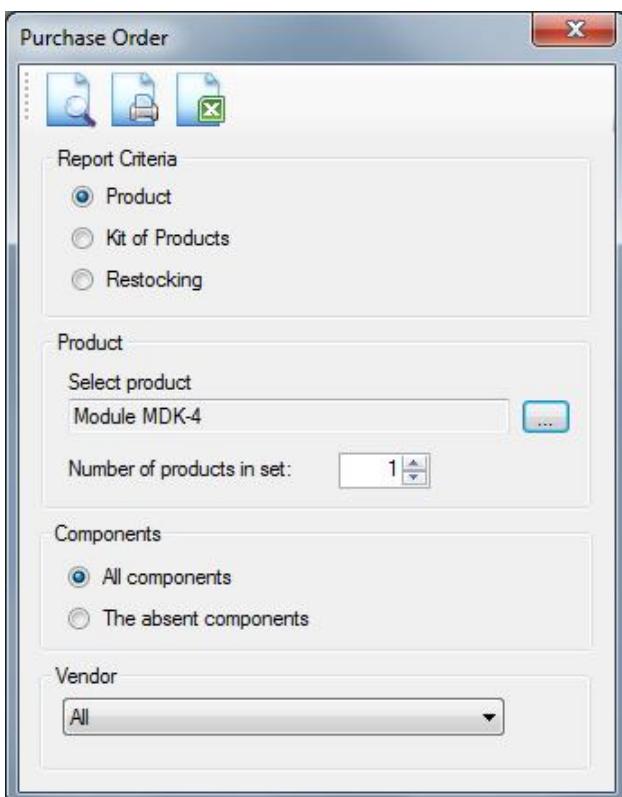

Click "Print" button to print the report.

The form of the report is given in Annex.

5.6.2. Purchase Order

This report provides a list of components to be acquired for the following cases:

- 1) Complectation of the product;
- 2) Complectation of a party of products;
- 3) Production of a kit of products;
- 4) Production of a party of kit of products;
- 5) Replenishment of minimum stock.

Click "Print" button to print the report.

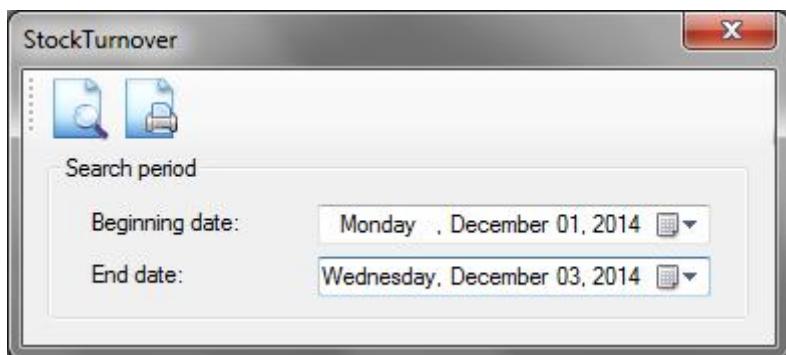

5.7. Analytics Reports

The program provides the following analytical data for any selected period of time:

- Information of circulation (the receipt and write-off) of the components
- Information of receipt of components from suppliers
- Information of the issues of the components in the products
- Information on the use of the components in the products
- Information on the nomenclature of the components for the selected vendor
- Information on the price movements of selected component

5.7.1. Stock Turnover Report

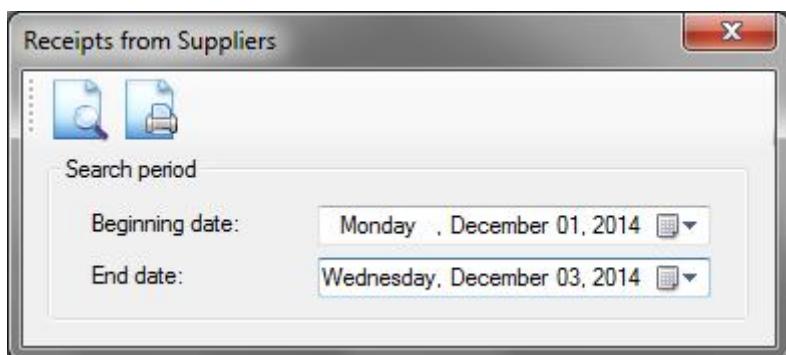

Report provides information on the amount of income and write-offs of each component for the selected period of time. This information allows you to minimize component procurement costs by optimizing the volume of orders.

Click "Print" button to print the report.

5.7.2. Receipts from Suppliers Report

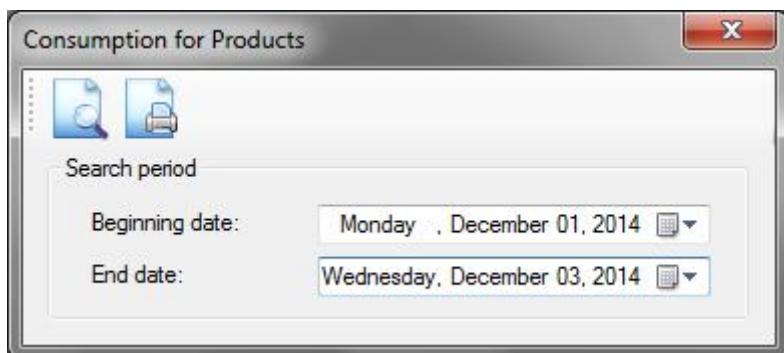

Report allows you to get statistics on the amount of components of the proceeds from all suppliers for the selected time period. This information allows you to determine the proportion of each supplier in the total procurement of components.

Click "Print" button to print the report.

5.7.3. Consumption for Products

Report allows you to get statistics on the amount of write-offs for all components finished products for the selected time period. This information allows you to determine the share of each product in total write-downs components.

Click "Print" button to print the report.

5.7.4. Used Components Report

Report provides information about the statistics of the use of components in the products. This information is useful for determining the most used components and unification of products.

A screenshot of a Windows-style dialog box titled "Used Components". It features three icons: a magnifying glass over a document, a printer, and a blue folder. Below the icons is a table with the following data:

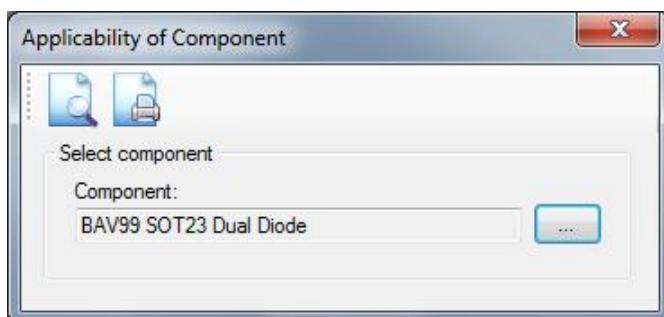

| No. | Component Name | Package | Products | Qty |
|-----|-------------------------------|---------|----------|-----|
| 1 | 1N4148 Diode | | 1 | 1 |
| 2 | BS-102B Relay | | 1 | 1 |
| 3 | Electr.Capacitor 2200 uF 10 V | | 1 | 2 |
| 4 | SMD 0805 4.7K Resistor | 0805 | 1 | 5 |
| 5 | SMD 1206 10K Resistor | 1206 | 1 | 1 |

Records: 5

Click "Print" button to print the report.

5.7.5. Applicability of Component Report

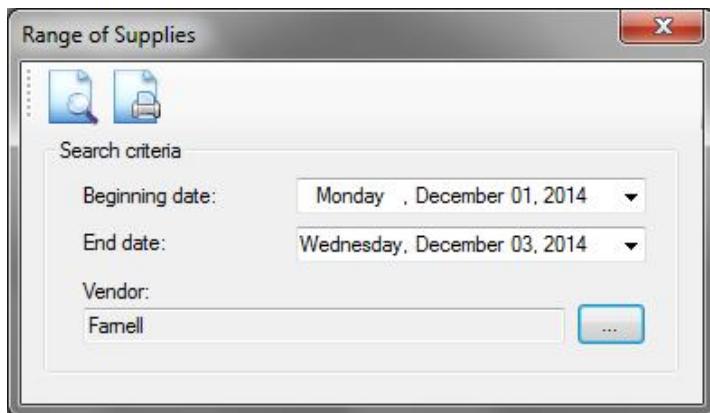

Report allows you to get detailed information about the products in which the selected component is used. This information is useful for the unification of products.

Select component and click "Print" button to print the report.

5.7.6. Range of Suppliers Report

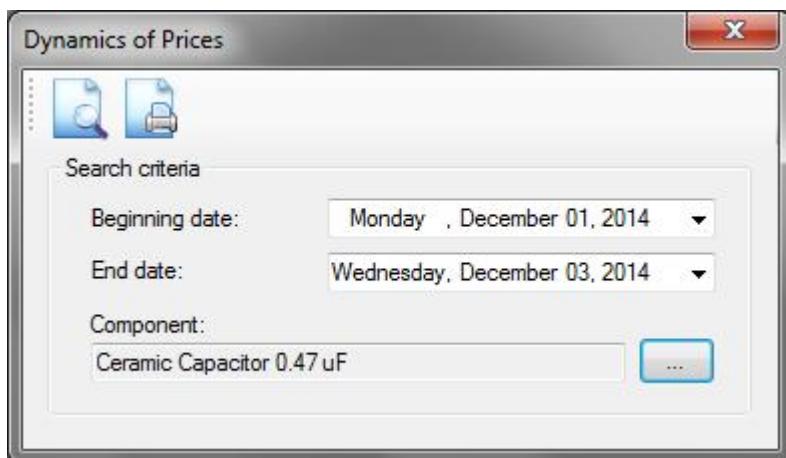

Report provides information about the range of components purchased from selected suppliers. This information is useful to diversify the supply of components.

Click "Print" button to print the report.

5.7.7. Dynamics of Prices Report

Report provides information about the selected component of the price movements. This information is useful to predict the cost of production.

Click "Print" button to print the report.

5.8. Data exchange

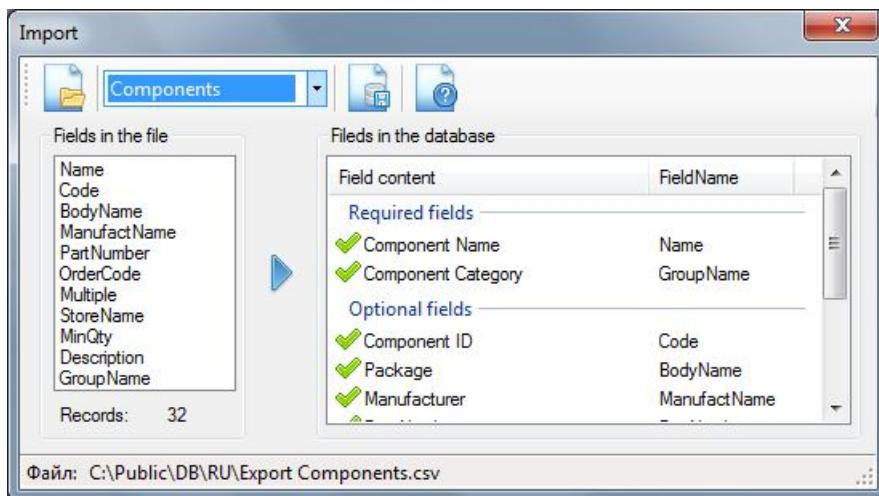

To exchange data with other programs using the CSV text files (Comma-Separated Values). Most programs, including Microsoft Office Excel, support loading and unloading of data in this format. File format is described in RFC 4180.

5.8.1. Import

The program allows you to upload the information into the database from a CSV file. The order of fields is an arbitrary. The contents of the file should meet the following requirements:

- 1) The field separator should correspond to the separator specified in the program settings.
- 2) The first line of the file must contain the headers of the data fields (field names).
- 3) The file must contain the required fields listed in the "Import" dialog.

To load the data, select item "Import" menu "File" of the main window, or click on the button "Import" in the dialog according to the type of imported data. You will see "Import" dialog box.

5.8.2. Export

Export settings include the selection of the separator, and a flag of the need to save in the first line of the file with the names of the data fields.

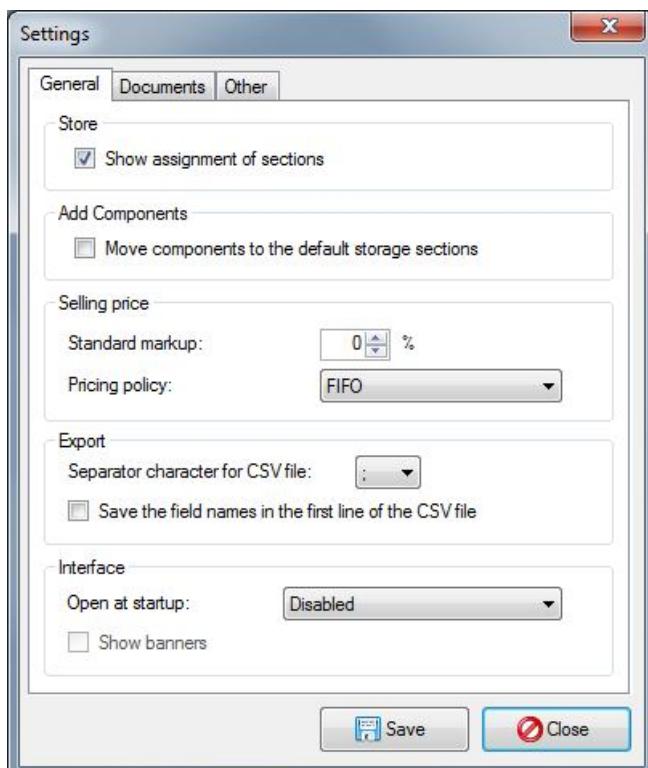

The list of exported fields, and the sort order of the data corresponds of the display columns in the table.

To save data to a file, click "Export to File" in the dialog box that contains the data to be exported.

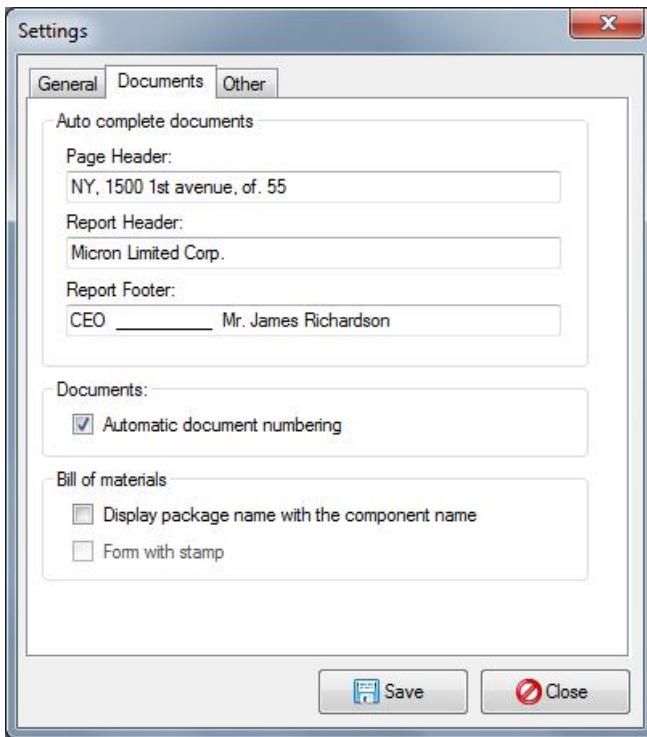

5.9. Preferences

5.9.1. Configuring application settings

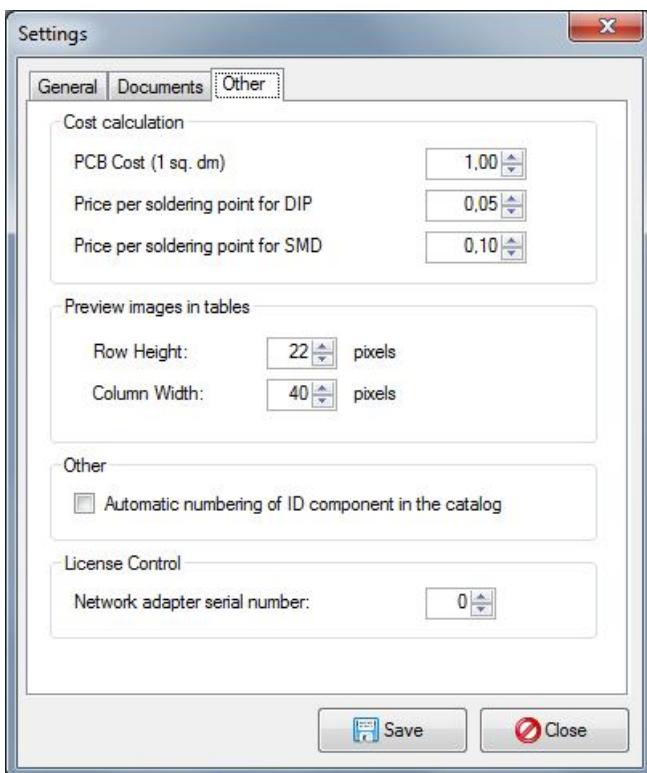

Select command "Settings" menu "Configuration".

Select the tab "Documents"

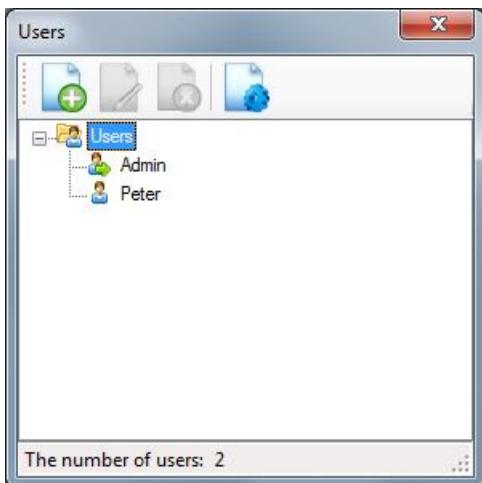

Select the tab "Other"

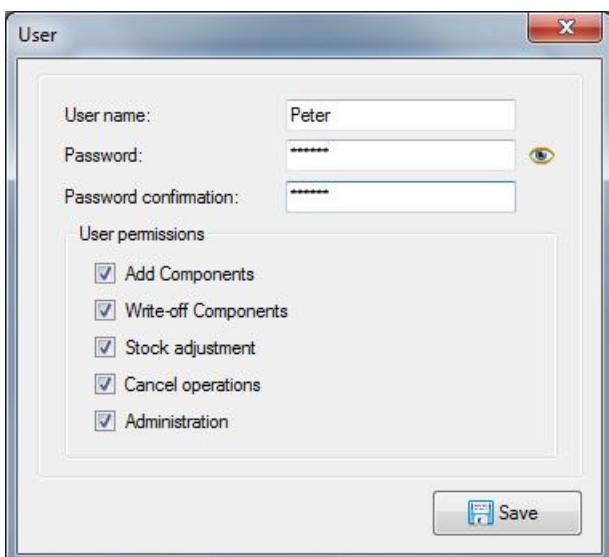

Press "Save" button to save the settings.

5.9.2. Manage security settings

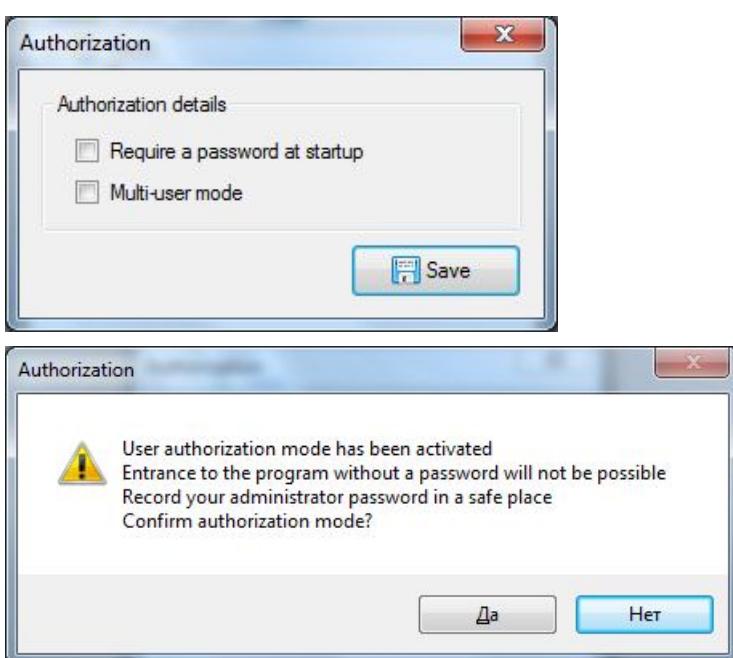

Select command "Users" menu "Configuration".

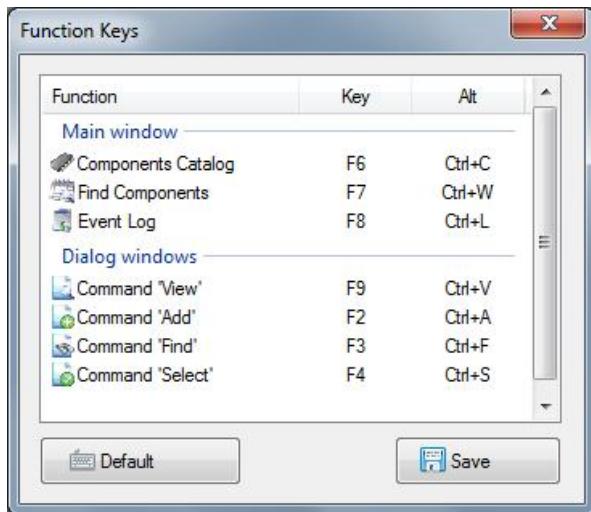

The default user icon is marked with a green arrow and the name "Admin". The default admin password is "123456". It is recommended to change it before turning on the authorization mode. The program is launched with the default user rights at the disabled user authorization mode.

By default the request of authorization is disabled. Press button "Login Options" in the menu "Configuration" and set flag in the "Authorization" dialog.

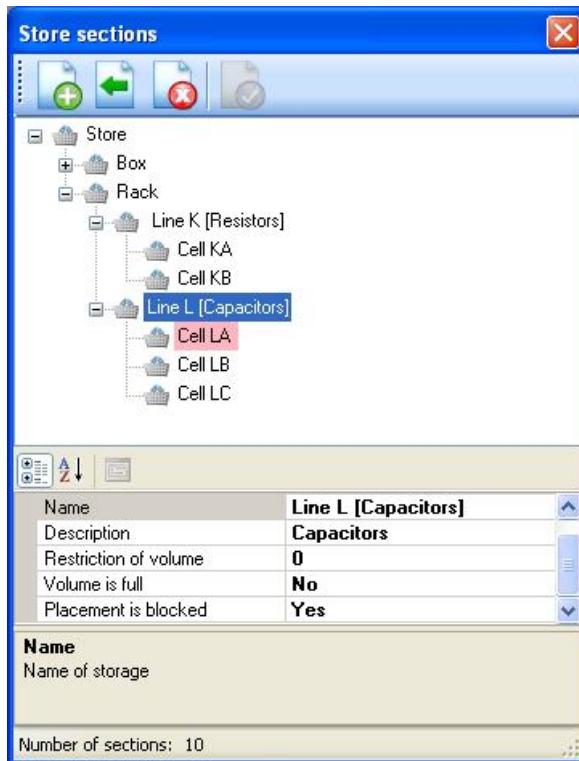

5.9.3. Function keys

5.9.4. Definition of the warehouse's structure

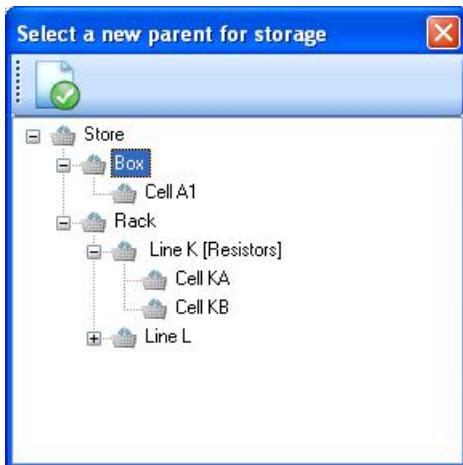

The program supports multi-level system of the warehouse. For example, a warehouse can include multiple racks, shelves, boxes and cells.

Click item "Store Sections" in the menu "Configuration" for definition of the actual warehouse's structure. Dialog "Store Sections" is displayed.

To expand or collapse all nodes right click on the tree. Select "Expand All" or "Collapse All" item in the context menu.

Click "Add new section" button to create a new section (storage, rack, box...). Section called "New section" will be created and added to the structure of the warehouse.

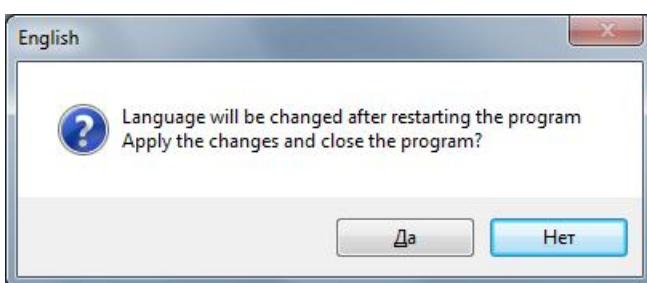

Select a new parent and click "Select" button.

5.9.5. Selecting a language

The program supports multi-language interface. The default language of the interface corresponds to the operating system language.

To change the interface language, click on the button in the toolbar and in the list that appears, select the desired interface language. A confirmation will be displayed.

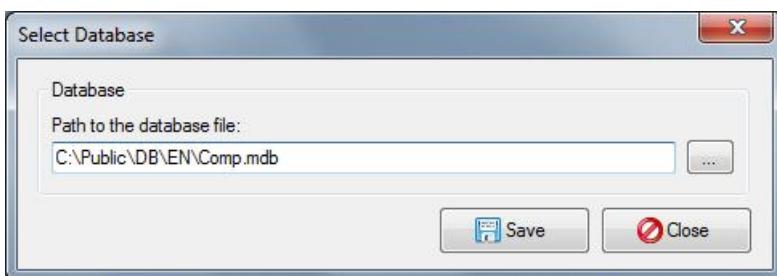

After confirmation, the program will be automatically closed. After restarting the program will have selected the required language.

5.10. Service functions

5.10.1. Select the database

If was changed the database location, click item "Select Database" menu "Tools". A dialog box "Select Database" appears on the screen.

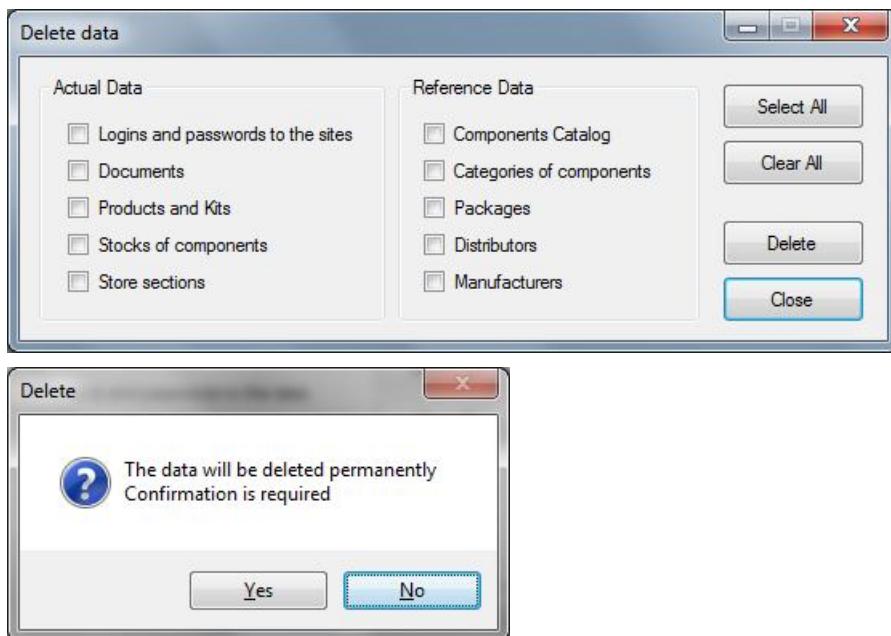

Select the database file "Comp.mdb" and click "Save".

Attention! After change of the path to the database it is required a restart program to reconnect.

5.10.2. Deleting data

Select command "Delete data" menu "Tools".

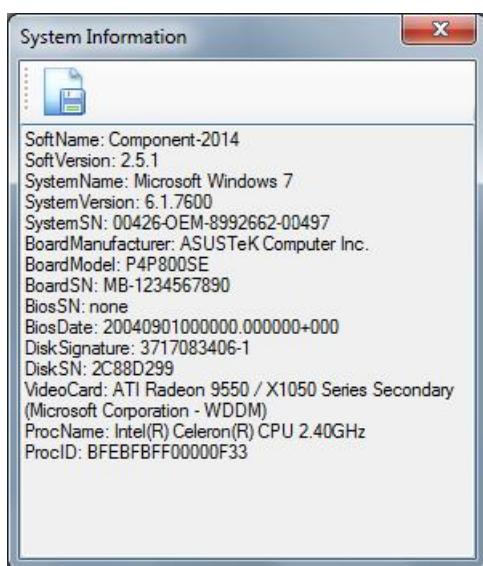

Click "Yes" button to delete the selected data. Click "No" button to cancel deleting.

WARNING:

It is recommended to make a copy of the database file before deleting the data.

5.10.3. System Information

Select command "System Information" menu "Help".

5.10.4. About dialog

Click "About" item from "Help" menu. The "About" dialog is displayed.

5.11. Software licensing

5.11.1. License options

The functionality of the program depends on the type of license. License options with their comparative characteristics indicated in the table.

| Software Restrictions | License | |
|--|---------|----------|
| | FREE | PRO |
| Limits the number of products | 5 | ∞ |
| Limits the number of storages | 7 | ∞ |
| Limits the number of components types in a warehouse | 70 | ∞ |
| Limits the number of components in a warehouse | 1000 | ∞ |
| Export data about stocks of components | - | ✓ |

The default program comes with a FREE license.

To expand the possibilities of the program is enough to get PRO license and activate the license key.

5.11.2. License info

To view information about the active license type, click the "License Info" menu "Help". You will see a window "License Info" with information about the active license.

5.11.3. Licensing description

The license grants the right to use the program on one computer. Checking license includes comparing the license key and ID code of PC.

ID code of PC is generated automatically based on the hardware configuration of the computer with the installed program.

To obtain a PRO license, you must open the dialog "License Info", copy the ID code of the computer from the field "ID Code" and send it to the address of the program developer.

If you change the ID code as a result of renovation or replacement of the hardware configuration of the computer the license key must be replaced at the user's request.

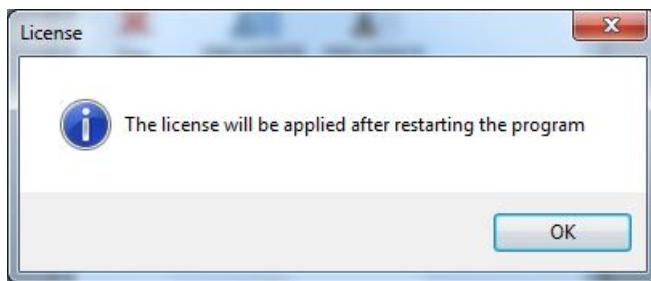

The database and program files can be placed and run from removable media (such as flash drives). You can enter more one license key for usage PRO license on some computers. The program select the active key automatically.

5.11.4. License activation

To enter a new license key, click on the "Add" button in the "License Information" dialog box. A dialog box will appear "New License".

Enter the received license key and click "Save." The program will confirm the saving of the license and will display alert you to restart.

5.11.5. Troubleshooting the license verification

Virtual network adapters can modify MAC address after restart the computer. It is cause, a change of ID code used for verification license key.

In this case, before requesting of the license key is recommended:

- 1) Click item "System Information" menu "Help". Wait until the completion of data collection and take a screenshot of the window.
- 2) Restart the computer and repeat first step. Compare the MAC addresses of network adapters before and after the reboot.
- 3) If there is no change, no additional configuration is required. If there are changes to remember the sequence number of the network adapter, MAC address, which remains unchanged.
- 4) Click item "Settings" menu "Configuration" and open the "Other" tab. Enter the sequence number specified in third step to the field "Network adapter serial number" of the panel "License control". Save the changes and restart the program.
- 5) Make sure the ID code in the "System Information" remains the same after a reboot.

5.12. Update version software

In the case of the release of a new version it becomes available for download from the developer's site. Updating is as follows:

- Download the latest version and unpack it from archive
- Make the database backup and save the old version of the program;
- Copy the new version to the catalog of the program
- Launch a new version of the program.

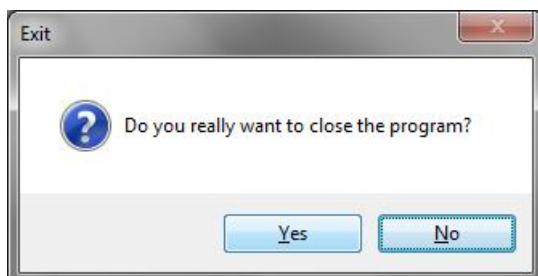

The program can ask for confirmation to update the database version:

After updating the database the new version of the program will be ready for use.

5.13. Closing the program

Select "Exit" item from "File" menu. The confirmation request will be displayed.

Click "Yes" button to close the program. Click "No" button to cancel closing.

WARNING! It is recommended periodically to make a copy of the database file in a safe place.

6. Technical Support

If you have any queries about using the program or you need additional information, contact us:
