

Hatchery Assist Feeding Procedures

Step 1 Creating a Feeding Period record for the Feeding Schedule Screen

This screen allows you to set up a Feeding Period Date range that is applied to the tanks using the Feed Schedule Screen. The date range is entirely up to you and can be per week, per month etc.

Edit Feeding Period

Feeding Date From: 07/03/2005

Feeding Date To: 07/03/2005

Feed Period Fish Id:

Fish Id	Tank Id	Date Assigned	Feed Stock Name

(0)

Buttons: Add, Edit, Delete, Save, Find, Delete, Reset, Print, Recalc, Cancel, Help, Import

Step 2 Feed Schedule Screen

This screen is used in conjunction with the Feeding Period Screen and relates back to it (see Feeding Date From and Date To fields). This is where you choose what tanks to feed by clicking on the Fish Id ? mark button or entering the tank id and then clicking on the fish Id ? mark button to looking up the current fish to Tank Assignment record.

Warning the Feed per day and Amt to Feed is calculated on the Average Weight of the fish and this screen must have your latest weight check tank records entered .If the Last Weight Check field is blank then you have not created a tank weight record and you should do this first before creating a Feed Schedule record for this tank.

Step 3 Daily Feed Records

This screen can be used to enter records manually or can be created using the Create Daily Feed Records Wizard which allows you to choose a feeding period record that finds all of the feed schedule associate records.

Daily Feed Record
