

Hatchery to Growout Assist Growth Screens

Fish Health Screen

This screen is used to record the fish health details are on the gills , a breakdown of the flesh content in vitamins, minerals etc and access to a external check of the flesh through a independent laboratory.

The screenshot shows a software window titled "Fish Health" with a tabbed interface. The "GILL" tab is selected. The form contains the following fields and controls:

- Fish Id:** A text input field with a question mark icon.
- Fish Count:** A yellow highlighted text input field.
- Date:** A date picker set to 15/11/2005.
- Check Type:** A dropdown menu currently showing "(None)".
- Total Fish Checked:** A text input field.
- Person Responsible:** A text input field with a question mark icon.
- Comment:** A large text area for notes.
- Vaccination Date:** A date picker set to 15/11/2005.
- Vaccination Details:** A text input field with a right-pointing arrow icon.
- Vaccination Method:** A dropdown menu currently showing "(None)".
- Lab Analysis:** A button located below the vaccination method dropdown.

At the bottom of the window, there is a row of navigation buttons: Save, Find, Delete, Reset, Print, Refresh, Cancel, Help, and Import. Above these buttons are four small icons: a keyboard key, a left arrow, a right arrow, and a keyboard key.

Tank Weight Check Screen

This screen is very important in the system and captures the details of your weight and length checks for each fish or a average of a number of fish. You can either put in your individual weight length samples using the following screen after this one **See A.**
