1. WHAT IS LINGUAPACK?

LinguaPack is independent software from LinguaNext Inc. that enables QuickBooks to be used in Spanish. It enables all QuickBooks version 12.0 screens and reports to be respectively viewed and printed in Spanish.

1.1 SYSTEMS REQUIREMENT

1. To install LinguaPack you require a PC with the following minimum specifications:
 - a. Pentium Pro processor or higher
 - b. 1 GB RAM or above
 - c. Windows XP Operating System with Service Pack 2 or higher
 - d. Intuit QuickBooks version 12.0
 - e. .Net framework 3.5 and above
 - f. 20 MB free disk space
 - g. Administrator privileges (i.e. You are either logged in as the user named 'Administrator' or a user who has full administration privileges on the computer)
 - h. If you are using Windows XP you have installed files for complex scripts and right-to-left languages and you have installed files for East Asian languages (see next section for details.)

1.2 OPERATING SYSTEMS COMPATIBILITY

1. Windows XP SP2 and above
2. Windows Vista Home and Business: 32-bit
3. Windows 7: 32-bit and 64-bit

2. REGIONAL AND LANGUAGE SETTINGS

"Read this section only if you are using Windows XP. If you are using Windows Vista or higher, skip to the next section".

You need to configure your Windows to support additional languages. This is a simple task, and does not need any technical support. You will, however, may need the Windows installation CD for installation additional files required by this option.

This step is required to ensure that the Windows on your PC gets activated to support languages other than English.

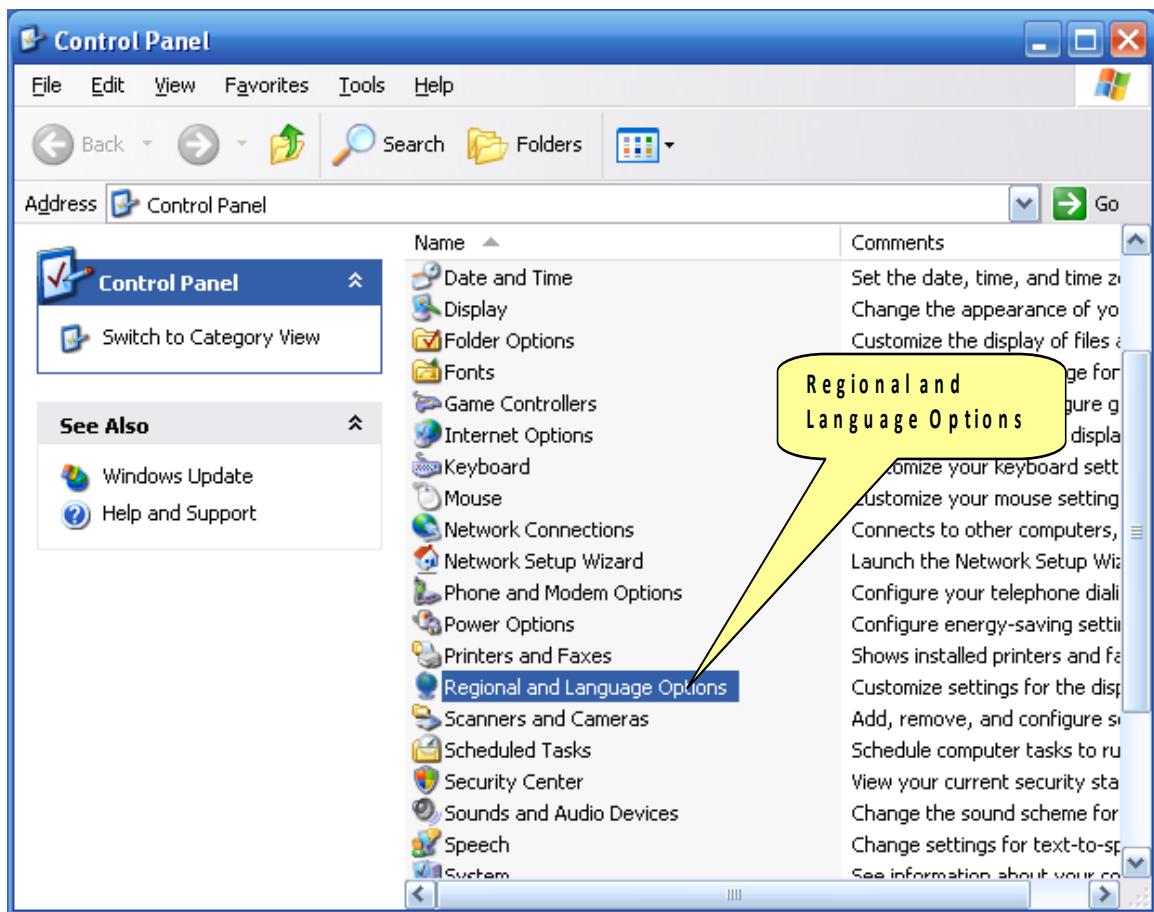

This setting will generally not have any effect on your existing installation. However, it is advisable to create backup of your data before activating this option.

Note: If you are using Windows Vista, you don't need to make any additional setting since these versions of Operating System have language support activated by default.

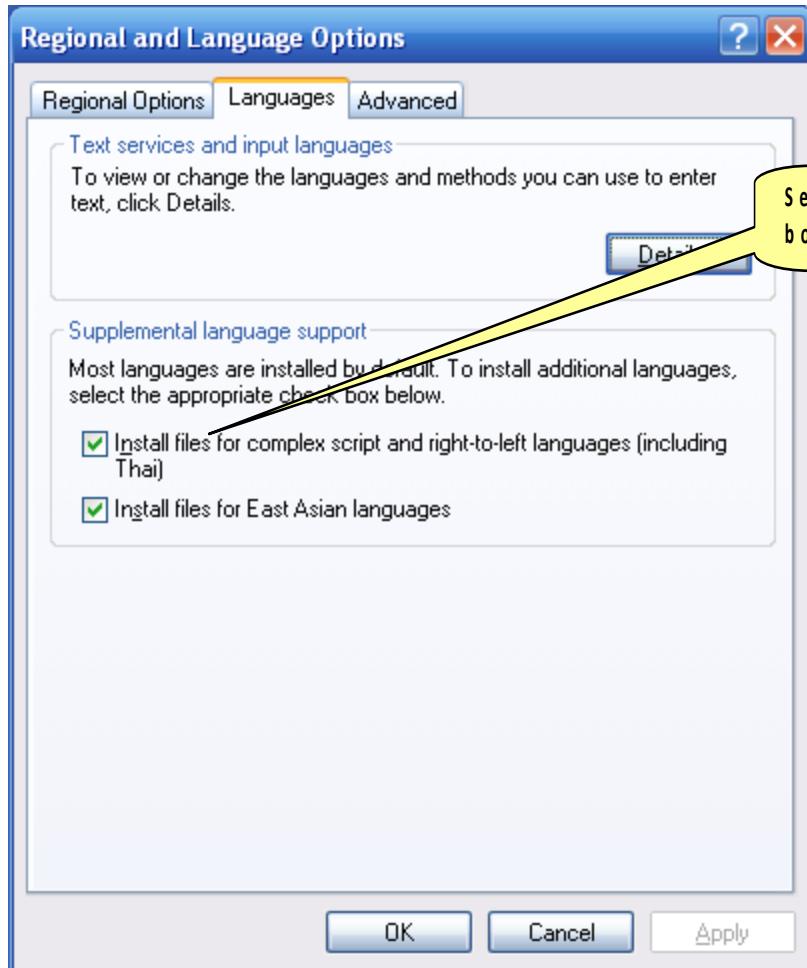

Activating additional language support:

Following steps show you how to configure Regional and Language Settings:

1. Save all your files and close all running applications since PC restart will be required after completion of this step.
2. Open "Control Panel" after clicking on "Start".
3. Select "Regional and Language Options"

4. Select "Languages" tab by clicking on the title of the tab. You will see the following screen:

5. Click on check box for - Install for complex script and right-to-left languages (including Thai). Additionally you can click on "Install files for East Asian languages".
6. Click on "OK" button. You may be prompted to insert the Windows XP installation CD for copying of additional files required by this option.
7. Insert the Windows XP Installation CD in your CD Drive and proceed with installation.

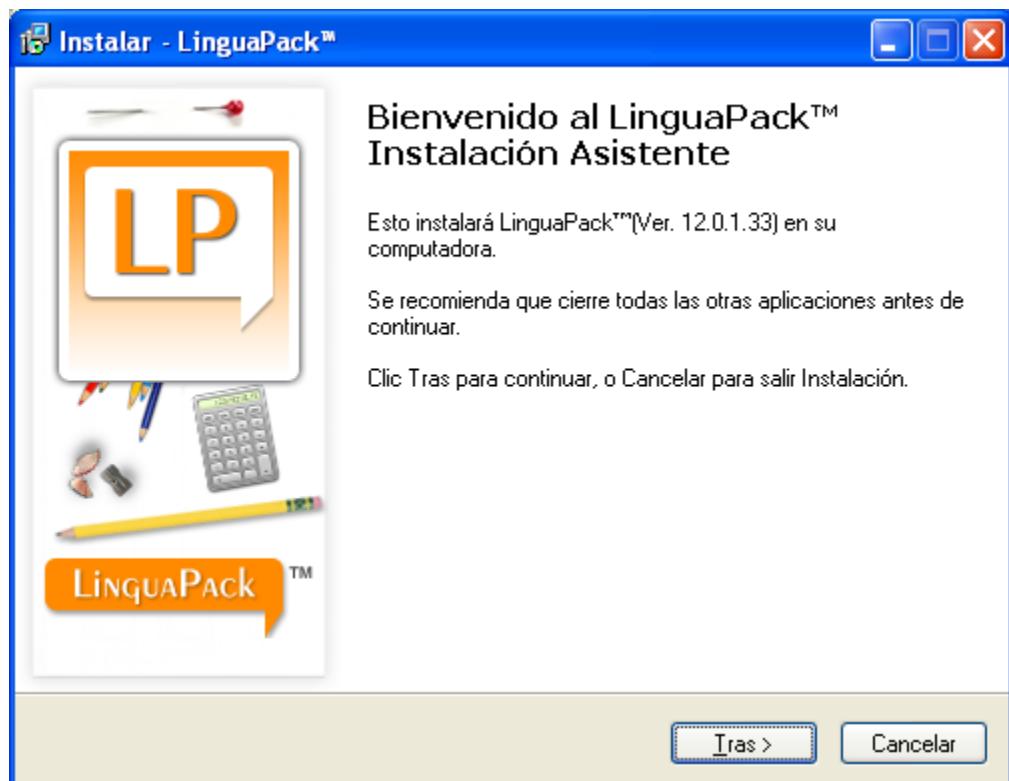

Note: In case your PC does not have CD drive, you may select alternate location for Windows XP installation files.

8. You will be prompted to restart Windows.
9. The Language setting will become effective after you have restarted Windows.

3. INSTALLING LINGUA PACK™

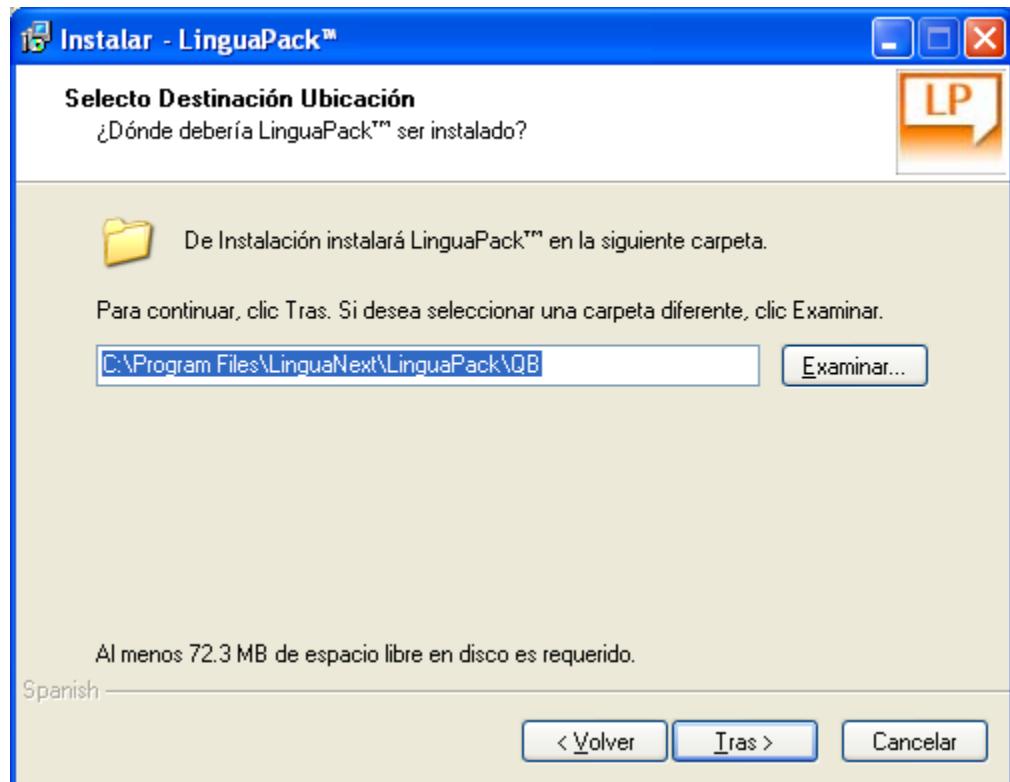

The following procedure needs to be followed for the installation for LinguaPack™ :

1. Log in on your PC as "Administrator" or as a User having "Administrator" rights on the PC. If you are already logged in as other User, log off and then log in as "Administrator" or as a User having "Administrator" rights on the PC
2. Download LinguaPack™ installer and user manual.
3. Double click on "LinguaPack™ Setup.exe" setup EXE to start installation of LinguaPack™ .
4. You will see the following screen. Click on "Next" button to continue installation.

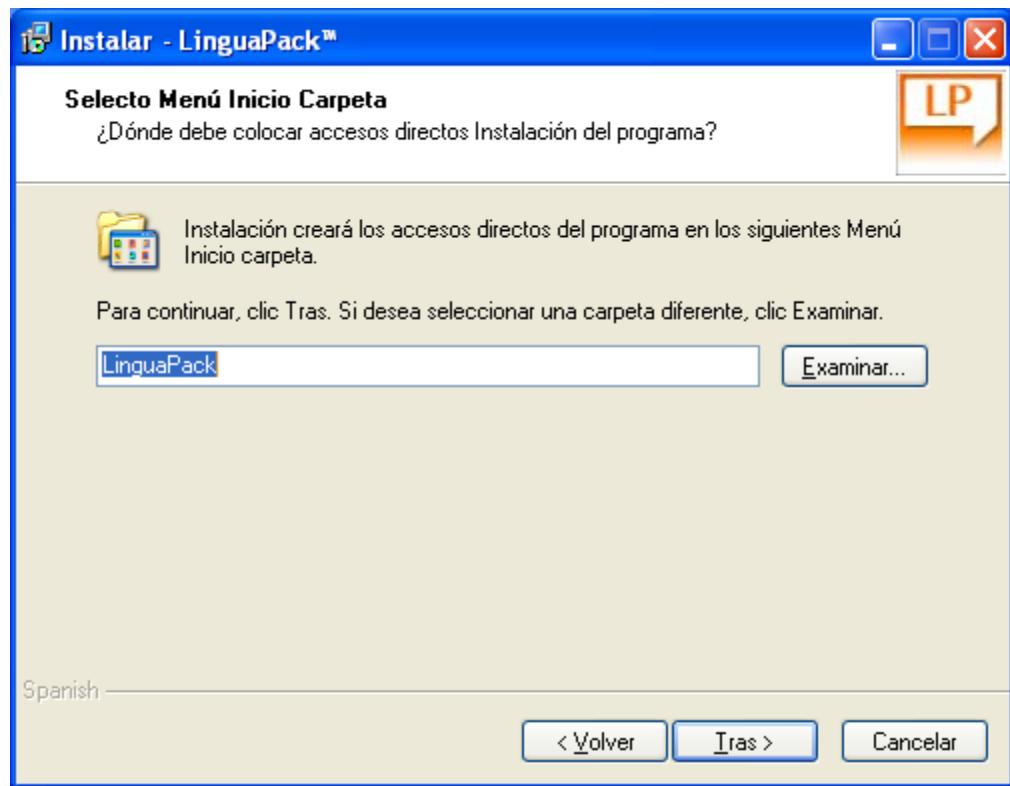

LinguaPack™ User Manual

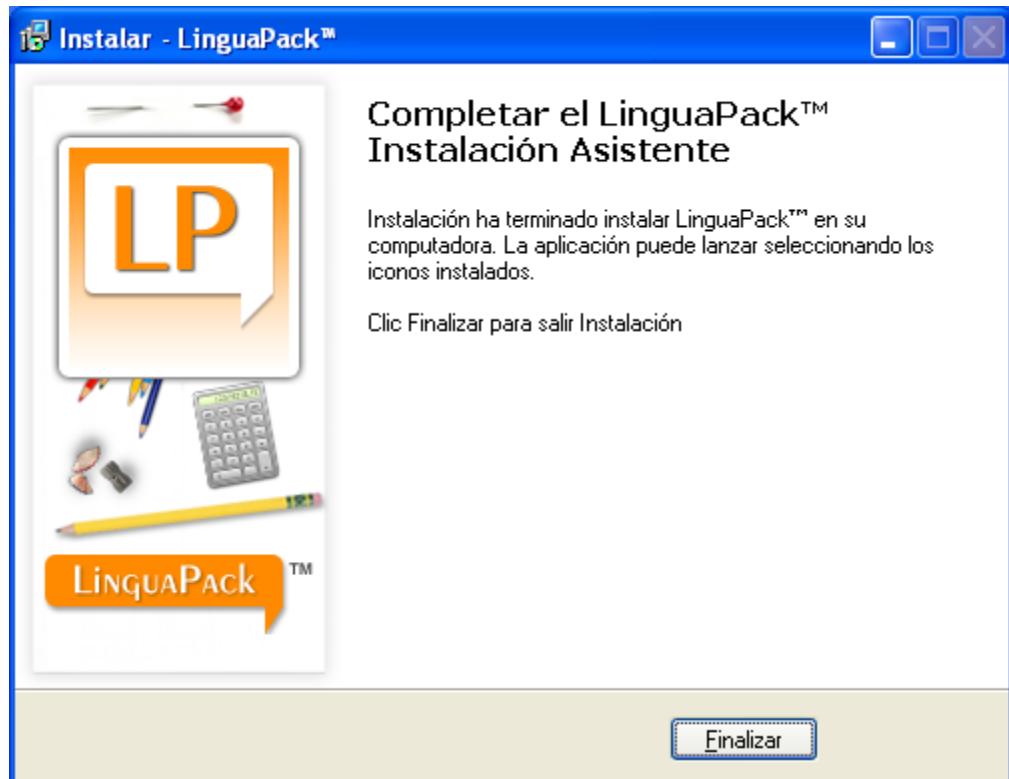

5. By default, the installer will prompt you with installation in folder "LinguaNext" inside the path of your "C:\Program Files" Drive.

6. Click on "Next".

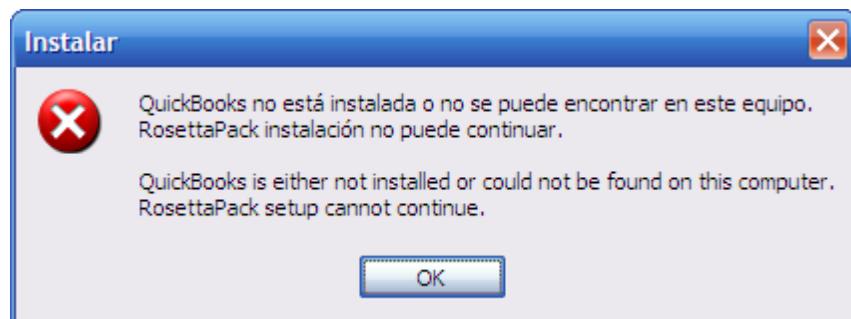

7. Click on "Next" button. Follow the instructions (keep clicking on Next unless you want to abort the installation). Allow the installation to complete. This process will take ½ to 2 minutes depending upon the PC configuration.
8. You should see the following screen if the installation is successful. Click on "Finish" button to complete the installation of LinguaPack™ .

9. You have successfully installed the LinguaPack™ !
10. In case some error occurred during installation process, please take help of your system administrator. If problem still persists, please send mail to our helpline.

Note: If QuickBooks is not installed on your system . Following message shows:
