

Veenix®  
**MusiMoods®**  
 Playlist Creator

## Introduction

**MusiMoods® Playlist Creator** is a gorgeous and sophisticated, yet easy-to-use playlist creator that organizes your music by mood or activities. Simply add your music and select a mood. Enjoy your playlist in the MusiMoods player or send your playlist to iTunes to transfer to your mobile device.

MusiMoods supports MP3 and Apple® ACC/M4A files. DRM-protected files are not supported.

## 2 Easy Steps To Enjoying MusiMoods

1. Launch MusiMoods. A dialog window will appear asking if you'd like to add your iTunes music. Click yes/okay and MusiMoods begins analyzing and adding tunes to your database. (Note: MusiMoods never moves or copies your actual music files. It simply stores a reference to where the files are located.)
2. After adding your tunes, click one of the color mood buttons or make a selection from the Playlist menu. That's it!

## System Requirements

**Computer:** Macintosh  
**System:** 10.5 or higher  
**Architecture:** Intel CPU

## Menu Reference

### File Menu

- **Add Tunes To Database...**

Use this feature to add tunes to your database. The standard file dialog appears and you may select any **folder** or entire **volume** to scan for music files. (Please note: MusiMoods never moves or copies your actual music files. It simply stores a reference to where the files are located.) MusiMoods supports **MP3** and **AAC/M4A** files. DRM protected files are not supported.

- **Add Tunes In iTunes...**

Use this feature to automatically add tunes to your database from your iTunes Library.

- **Flush MusiMoods Database**

Use this feature to remove all the tune references from your database.

- **Reveal Selected Tune In The Finder**

Use this feature to locate a physical tune file in the Finder.

- **Send Playlist to iTunes**

Use this feature to create a playlist in iTunes. A dialog window will appear asking you to name your playlist and enter the number of tunes to include.

### Playlists Menu

- **All Tunes**

Use this feature to see a list of all the tunes in your database. Selecting this playlist does not cause immediate playback.

- **Color/Mood Menu Items**

Select a color/mood item to create a playlist of tunes of that particular mood/activity.

- **Mood By Genre Menu Items**

Select a genre and subsequent color/mood item to create a playlist of tunes of that particular genre and mood/activity.

- **Create Playlist From Tune**

Use this feature to create an instant playlist of tunes similar to the selected tune. Selecting this playlist causes immediate playback.

- **More From Artist**

Use this feature to create an instant playlist of all tunes by the selected or currently playing artist. Selecting this playlist causes immediate playback.

- **More From Album**

Use this feature to create an instant playlist of all tunes in the selected album. Selecting this playlist causes immediate playback.

- **More From Genre**

Use this feature to create a playlist of all tunes in the selected genre. Selecting this playlist causes immediate playback.

- **Surprise Me**

Use this feature to create a tune based playlist of a randomly selected tune and all tunes similar to it. Selecting this playlist causes immediate playback.

- **Last Added**

Use this feature to see a list of the last tunes that were added to your database. Selecting this playlist does not cause immediate playback.

## **Edit Menu**

- **Set Genre For This Artist**

Use this feature (and submenu) to select a genre for the selected artist. All tunes for the given artist will be set to the selected genre, except tunes listed as Holiday or Soundtrack.

- **Set Genre For This Album**

Use this feature (and submenu) to select a genre for the selected album. All tunes in the selected album will be set to the selected genre, except tunes listed as Holiday or Soundtrack.
