(System requirements are subject to change without notice. Please consult the web site for the latest information.)

- Windows® XP/Vista/7/8
- Macintosh OSX 10.6 - 10.8
- FileMaker Pro 8 thru 12

Requires Adobe Acrobat 8 Standard, Professional or above to transfer data with the plug-in AND Adobe Acrobat 8 Professional to create form fields.

FileMaker and the file folder logo are the registered trademarks of FileMaker, Inc. in the U.S. and other countries. FileMaker images are used with the permission of FileMaker, Inc.

Updated: 9/3/13

This powerful utility plug-in provides a bi-directional data exchange between FileMaker® Pro and Adobe® Acrobat. Whether you need to search text contained within a PDF document, or extract data from PDF form fields, this is the plug-in for you. Using the PDF Manipulator you can create a searchable document management system. Process forms faster by eliminating the need to hand key the information into your database.

Document Management:

The plug-in allows you to extract the text content and metadata of a PDF document directly into your FileMaker solution. Once in your database you can search through the content inside the document and even determine what page of the document the content appears on!

Form Automation:

By using the plug-in you can insert or extract data between PDF form fields and FileMaker, speeding up and reducing the effort required to do this manually! This is very useful for industries and organizations that depend heavily on forms (government agencies, IRS, real estate and mortgage brokers, etc.).

Combining PDFs:

Combine and delete multiple PDF documents into a single PDF from within FileMaker Pro.

This is a PDF document.

This is the content of the PDF document imported into FileMaker.

Step 1: Browse and Open target PDF [Volumes/LocalHD 3/Users/Admin/Desktop/Document.pdf] Browse for PDF File Open PDF File Results: 0

Step 2: Extract Field Names, Field Values, Metadata and Page Text Contents Extract

Step 3: Apply changes to PDF if Field Values above were changed Apply Changes

Step 4: Save PDF to location specified (optional) Save PDF [Volumes/LocalHD 3/Users/Admin/Desktop/Updated.pdf]

Step 5: Print the PDF (optional) Print PDF

Step 6: Close PDF file (recommended) Close PDF

Any Questions?

Plug-in Information:

Successful integration of FileMaker plug-ins require the creation of integration scripts within your FileMaker solution. A working knowledge of FileMaker Pro, especially in the areas of scripting and calculations is necessary. If after review of our overview videos, sample scripts and documentation you find you need assistance, please [contact us](#) or fill out a [Request For Quote](#).
