PDMLynx Initial Installation Instructions

1. Run the PDMLynx executable on target windows PC. If the machine does not have the needed .net files they will be installed as part of the setup which could significantly lengthen the time for the install.

2. Launch PDMLynx. It will walk you through several install questions.

3. Is this a first time install -> yes,   then next

4. Use PDMLynx sample database for installation of first time install?
   a. Answering yes provides the user with a sample database to learn the software. This is <u>recommended</u> as an easy starting point to learn the software. A customer specific database can be configured at a later date.
   b. Answer no and PDMLynx guides the user through a series of database configuration questions to tailor the database structure to the customer's specific needs

5. Next establish a new admin password and enter/edit registration info
   a. Complete all the fields as this information is used in the licensing process.
      i. Leave the authorization code blank
      ii. Hit next
      iii. Send the registration info generated to register@PDMLynx.com
      iv. You can continue the installation in trial mode. Your license key will be sent via email within 24 hours

A detailed administrator's manual describing the software setup is available in the admin module under the help menu.

A detailed Users manual describing the software use is available in all the other modules under the help menu.
